

# Fund Update

For the quarter ended 31 March 2026

- **Squirrel Investment Funds**
- **Squirrel Monthly Income Fund**

This fund update was first made publicly available on: 01 May 2026

## What is the purpose of this update?

This document tells you how the Squirrel Monthly Income Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. FundRock NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

## Description of this fund

**Objective:** To provide an annual return, after fees and before tax, that outperforms the 1 Year New Term Deposit Rate (>\$10k) by a margin of 2.00%.

**Strategy:** The Fund is designed to provide investors with a regular income return generated through exposure to a diversified portfolio of loans secured against registered first mortgages on residential property across New Zealand. Loan exposure is obtained by investing in the Squirrel Wholesale Investment Funds scheme ("Squirrel Wholesale Funds"), whose funds obtain their loan exposure through investing via the Squirrel peer-to-peer ("P2P") platform operated by Squirrel Money Limited ("Squirrel"). Assets of the Squirrel Wholesale Funds may include exposure to fractional and/or whole loans, as well as cash and cash equivalents.

Total value of the fund	\$NZ 210,050,397
The date the fund started	13 October 2021

## What are the risks of investing?<sup>1</sup>

Risk indicator for the Squirrel Monthly Income Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz)

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

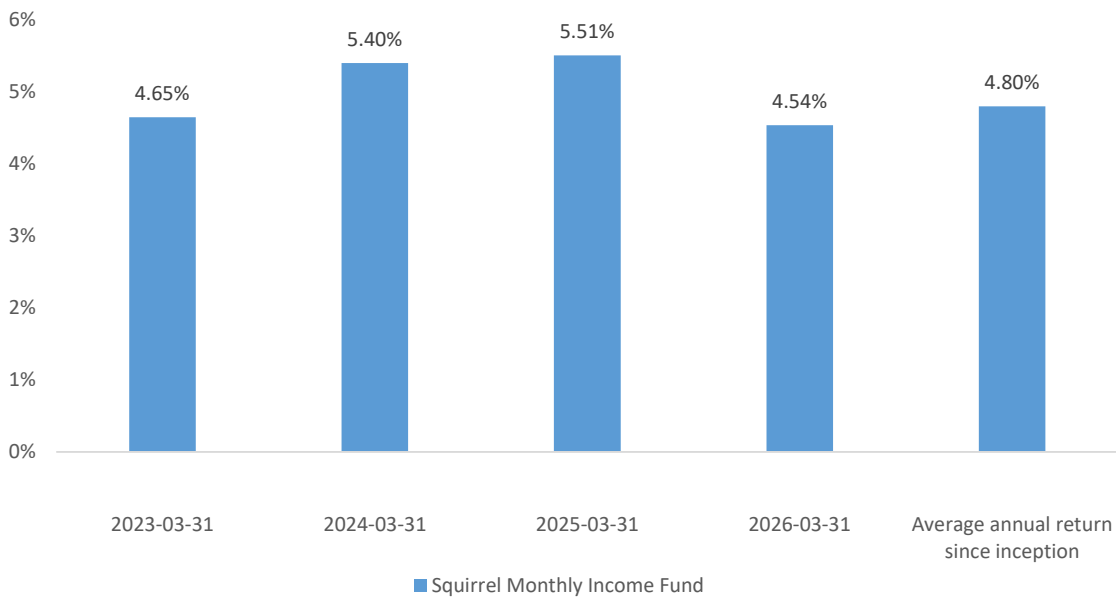

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

### How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	4.54%
Annual return (after deductions for charges but before tax)	6.34%

Having exercised reasonable endeavours, FundRock has determined that there is neither relevant index nor benchmark for the relevant assets of the Fund, which relies on the provisions of the Financial Markets Conduct Regulations, Schedule 4, Section 99. The Fund invests in Underlying Funds, which in turn invest in construction and home loans related to properties throughout New Zealand. FundRock is not aware of any market index that covers these assets and meets the regulatory requirements. The Fund also holds cash for liquidity purposes. While there are market indices available for this asset class, FundRock does not believe that an appropriate market index for this asset would be likely to be useful to investors when assessing the performance of the Fund as a whole

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2026

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Squirrel Monthly Income Fund are charged fund charges. In the year to 31 March 2026 these were:

	% of net asset value (including GST)
Total fund charges	2.14%
Which are made up of:	
Total manager and administration charges	2.14%
Including:	
Manager's basic fee (including GST)	2.06%
Other management and administration charges	0.08%

(A) The total fund charges for the most recent financial year differ from the estimate disclosed in the Product Disclosure Statement (PDS), primarily due to a higher than anticipated platform service margin. Notwithstanding this variance, the fee estimate disclosed in the PDS remains a reasonable and appropriate indication of expected future total fund charges. (B) "Manager's basic fee" includes an estimate of the charges incurred in the underlying fund in which the fund invests. The estimate incorporates information provided by the underlying fund manager as well as information sourced from the underlying fund's disclosure documents. Other management and administration charges includes audit, legal and administration fees.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Squirrel Monthly Income Fund on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz) for more information about those fees.

## Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$634 (that is 6.34% of his initial \$10,000). This gives Anthony a total return after tax of \$454 for the year.

## Notes

- <sup>1</sup> A combination of actual fund returns and estimated returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Estimated returns have been used until 31 October 2021 and fund returns thereafter. The basis for determining the estimated returns is to use a proxy market index, comprising 40% of the Bloomberg NZBond Bank Bill Index and 60% of the Bloomberg NZ Bond Composite 0+ Yr Index, for the period to 31 October 2021. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
- <sup>2</sup> Exposure to private fixed and variable interest rate loans on the Squirrel P2P platform. Full details of the strategy and permitted investments for the fund are outlined in the SIPO.
- <sup>3</sup> The Manager has prepared this additional information in accordance with the Financial Markets Conduct (Squirrel Investment Funds) Exemption Notice 2021.
