## What are the risks of investing? See note 1

Risk indicator for the Schroder Sustainable Global Core PIE Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 Mar 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

## Notes

1. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until 30 November 2023 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.
3. As the fund only started accepting contributions on 1 December 2023, historical fee information is not available
