

# Fund Update

For the quarter ended 31 December 2022

- **Coolabah Investment Funds Scheme**
- **Coolabah Short Term Income PIE Fund**

This fund update was first made publicly available on: 10 February 2023

## What is the purpose of this update?

This document tells you how the Coolabah Short Term Income PIE Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Implemented Investment Solutions Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

## Description of this fund

**Objective:** Targets investment returns, after fees and before tax, of 1.5% to 3.0% per annum above the overnight interbank cash rate as published by the Reserve Bank of New Zealand, over a rolling 12 month period.

**Strategy:** Provides exposure to an actively managed, diversified portfolio that aims to take advantage of investment opportunities within the Australian cash and fixed income markets.

Total value of the fund	\$NZ 22,530,908
The date the fund started	09 December 2021

## What are the risks of investing?<sup>1</sup>

Risk indicator for the Coolabah Short Term Income PIE Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz)

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

## How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	-0.87%
Annual return (after deductions for charges but before tax)	0.06%
Market index annual return (reflects no deduction for charges and tax)	1.77%

The market index return is the Bloomberg AusBond Bank Bill Index hedged into New Zealand dollars. This has been the market index since the inception of the fund. Additional information about the market index is available on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

## What fees are investors charged?

Investors in the Coolabah Short Term Income PIE Fund are charged fund charges which are:

	% of net asset value (including GST)
<b>Total fund charges (including GST)<sup>2</sup></b>	<b>0.94%</b>
Which are made up of:	
Total manager and administration charges (including GST)	0.94%
Including:	
Manager's basic fee (including GST)	0.66%
Other management and administration charges	0.03%
Total performance-based fees	0.25%

See the product disclosure statement for more information about the basis on which performance fees are charged.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Coolabah Short Term Income PIE Fund on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz) for more information about those fees.

## Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$6 (that is 0.06% of his initial \$10,000). This gives Anthony a total loss after tax of \$87 for the year.

## What does the fund invest in?

This shows the types of assets that the fund invests in.

## Further information

You can also obtain this information, the PDS for the Coolabah Investment Funds Scheme, and some additional information from the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

---

## Notes

1 The Funds invest in other funds ("underlying funds") which each have an established return history. A combination of actual fund returns and underlying fund returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Underlying fund returns have been used until 31 December 2021 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.

2 As the fund only started accepting contributions on 09 December 2021, historical fee information is not available.
