### FEES

Service Fee (incl. VAT p.a.):	1.04%
Cost Ratios (incl. VAT):	
* Total Expense Ratio (TER) <sup>2</sup> :	1.03%
* Transactions Costs Ratio (TC%) <sup>2</sup> :	0.00%
* Total Investment Charges (TIC%) <sup>1</sup> :	1.03%
* Performance Fee (PF) Included in TER:	0.00%

<sup>1</sup> Total Investment Charges (TIC%) = TER (%) + TC (%). <sup>2</sup> The Total Expense Ratio (TER%) of a portfolio, expressed as a percentage of the daily average value of the portfolio, is calculated over a period of usually a financial year and represents a measure of the portfolio's assets that were relinquished to meet portfolio operating costs, including charges, levies and fees. Typical expenses which are deducted from a portfolio include service charges, taxes, trustee fees and audit fees. <sup>3</sup> Unit prices are published daily on the Manager's website. Investor instructions received after 14:00pm shall be processed the following business day.

## MARKET COMMENTARY

During the final week of October, the South African rand traded within a relatively narrow band against the US. dollar, fluctuating between a high of 17.3587 on 31 October and a low of 17.0897 on 29 October. The most notable daily movement occurred on 29 October, when the rand appreciated by 0.633%.

South Africa's 10-year government bond yield eased below 9%, its lowest level since January, supported by higher real returns and growing expectations of U.S. interest rate cuts. As one of the world's leading gold producers, South Africa also continues to benefit from sustained strength in the gold price, further enhancing its investment appeal. Real yields remain among the most attractive in emerging markets, underpinned by credible monetary policy, a more stable currency, and gradual structural improvements such as a more reliable power supply and increased infrastructure investment. Local bonds have additionally gained from the South African Reserve Bank's implicit shift toward the lower end of its 3%-6% inflation target range. On the fiscal side, government efforts toward consolidation remain on track, with debt stabilization and a larger primary surplus expected for the 2025/2026 fiscal year.

In regulatory and political developments, the Department of Transport confirmed that a Foreign Operator's Permit was granted to the Russian Abakan Air cargo aircraft that recently landed in Upington under unusual circumstances. The U.S.-blacklisted Ilyushin IL-76, which arrived heavily loaded and departed empty after refueling at Lanseria, has drawn scrutiny due to its undisclosed cargo. Meanwhile, the government unveiled a new energy policy blueprint signaling a renewed commitment to modular nuclear reactors and greater reliance on natural gas in power generation.

According to Moody's Ratings, South Africa's ongoing structural reforms are gradually improving the country's economic resilience, though not yet sufficient to lift growth to the government's 3.5% target. Economic expansion has averaged below 1% annually over the past decade, constrained by deteriorating infrastructure, energy shortages, logistical inefficiencies, and persistent governance challenges. The coalition government formed after last year's election, when the African National Congress lost its parliamentary majority, has made reform acceleration a key priority, targeting a growth rate of up to 3.5% by 2030.

Inflation remained contained, with the annual consumer price index rising to 3.4% in September from 3.3% in August, slightly below market expectations of 3.5%. The uptick was largely driven by higher costs for housing, utilities, and hospitality services, while transport costs declined at a slower pace. Food inflation, meanwhile, recorded its smallest increase in five months. The inflation rate remains comfortably within the SARB's target range of 3%-6%.

Globally, the U.S. Federal Reserve reduced the federal funds rate by 25 basis points to a target range of 3.75%-4.00% during its October meeting, in line with expectations. While one member advocated a deeper 50 bps cut and another preferred no change, Chair Jerome Powell emphasized that further rate reductions in December are not guaranteed. U.S. CPI data showed a 0.3% monthly increase in September, with annual inflation rising to 3.0% from 2.9% in August.

In corporate news, JPMorgan Chase appointed Conor Hillery and Matthieu Wiltz as co-Chief Executive Officers for Europe, the Middle East, and Africa. The leadership change underscores the bank's commitment to expanding its presence in the region, with a goal of increasing EMEA revenues by 20% by 2030. Hillery and Wiltz, both long-serving executives, succeed Filippo Gori, bringing nearly five decades of combined experience to their new roles.

**Please Note:** The above commentary is based on reasonable assumptions and is not guaranteed to occur.

## GLOSSARY

**Net Asset Value (NAV):** Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.

**Annualised Return:** Is the weighted average compound growth rate over the performance period measured.

**Highest & Lowest Return:** The highest and lowest rolling twelve-month performance of the portfolio since inception.

**Total Expense Ratio (TER):** Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

## FUND RISK

**Credit Default Risk:** The risk that the government entity or company that issued the bond will run into financial difficulties and won't be able to pay the interest or repay the principal at maturity. Credit risk applies to debt investments such as bonds. The higher credit rating the less likely the possibility of the issuing company defaulting.

### INVESTMENT MANAGER

Taquanta Asset Managers (Pty) Ltd

Registration Number: 1999/021871/07

5th Floor Draper on Main, 47 Main Road, Claremont, Western Cape, 7708

Telephone: +27 21 681 5100

Email: [info@taquanta.com](mailto:info@taquanta.com)

Website: [www.taquanta.co.za](http://www.taquanta.co.za)

**Transaction Costs (TC):** Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.

**Total Investment Charge (TIC):** Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.

**Total Investment Charges (TIC%):** = TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

**Interest Rate Risk:** The values of bonds and other debt securities are inversely proportional to the change in interest rates. Interest rate risk is generally greater for investments with longer maturities as well as when the market does not expect a change in the interest rates.

## MANDATORY DISCLOSURES:

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges, minimum fees, and maximum commissions, as well as detailed description of how performance fees are calculated and applied, is available on request from FundRock Management Company (RF) (Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commissions and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published daily on the Manager's website. Additional information, including Key Investor Information Document ("KIID"), Minimum Disclosure Document ("MDD"), as well as other information relating to the basis on which the Manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority ("the Authority") under the Collective Investment Schemes Control Act No. 45 of 2002 ("CISCA"). The Manager retains full legal responsibility for the portfolio

The annualized total return is the average return earned by an investment each year over a given time period, since the launch date of the portfolio. Actual annual figures are available from the Manager on request. The highest and lowest one (1) year returns represent the highest and lowest actual returns achieved during a 12-month rolling period year since the first launch date of the portfolio. The performance figures are the yields on a Net Asset Value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed, and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance fees will be calculated and accrued on a daily basis based upon the daily outperformance, in excess of the benchmark, multiplied by the share rate and paid over to the manager monthly. Performance is calculated for a lump sum investment on a NAV. The performance figures are reported net of fees with income reinvested. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Prices are published on our website daily.
