

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	58.56%
Annual return (after deductions for charges but before tax)	60.33%
Market index annual return (reflects no deduction for charges and tax)	63.07%

The market index return is the S&P Bitcoin Index in New Zealand dollars. This has been the market index since the inception of the fund. Additional information about the market index is available on the offer register at www.disclose-register.companiesoffice.govt.nz.

Annual Return Graph²

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2023

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Vault International Bitcoin Fund are charged fund charges. In the year to 31 March 2023 these were:

	% of net asset value (including GST)
Total fund charges	1.89%
Which are made up of:	
Total manager and administration charges	1.89%
Including:	
Manager's basic fee (including GST)	0.57%
Other management and administration charges	1.32%

Other management and administration charges includes an estimate of the charges incurred in the underlying fund in which the fund invests. The estimate incorporates information provided by the underlying fund manager as well as information sourced from the underlying fund's disclosure documents.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Vault International Bitcoin Fund on the offer register at www.disclose-register.companiesoffice.govt.nz for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$6,033 (that is 60.33% of his initial \$10,000). This gives Anthony a total return after tax of \$5,856 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual investment mix

The Fund is not hedged back to New Zealand dollars.

Target investment mix

* Other represents listed offshore domiciled funds that invest directly in Bitcoin.

Top 10 investments

	Name	% of Fund net assets	Type*	Country	Credit rating (if applicable)

Further information

You can also obtain this information, the PDS for the Vault Digital Funds, and some additional information from the offer register at www.disclose-register.companiesoffice.govt.nz.

Notes

1 A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until September 2021 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.

2 The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.
