Basis of Accounting

The interim report and unaudited Financial Statements have been prepared under the historical cost basis, as modified by revaluation of investments and in accordance with FRS102 and the Statement of Recommended Practice ('SORP') for Financial Statements of UK Authorised Funds issued by the Investment Association ('IA') in May 2014 and amended in 2017.

The interim unaudited Financial Statements have been prepared on the same basis as the audited Financial Statements for the year ended 28 February 2025.

The Financial Statements have been prepared on the going concern basis.

Certification of the Interim Report by the Authorised Corporate Director

This report has been prepared in accordance with the requirements of the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('the COLL Sourcebook') and the Statement of Recommended Practice for Financial Statements of UK Authorised Funds issued by the IA.

Investment Objective

The Sub-fund will aim to provide a positive return after costs (from investment growth and income) on a rolling five year basis. A positive return is not guaranteed over five years or any period and you could lose money.

Investment Policy

The Sub-fund has a flexible approach, using a broad range of asset classes, instruments and techniques. Allocations may vary significantly and exposure to certain asset classes, markets, sectors or currencies may be concentrated from time to time, in response to market conditions and opportunities. The Sub-fund can invest globally (including in emerging markets).

The Sub-fund will typically be invested (directly or indirectly) 70% or above but will never fall below 50% in alternative assets such as commodities (including gold and other precious metals), real estate, private equity, and absolute return strategies. The Sub-fund may also have exposure to equities, debt instruments, cash and near cash.

Allocation to these asset classes and strategies will be achieved through investment in transferable securities, collective investment schemes, derivatives and money market instruments.

The debt instruments may include a range of global direct debt securities issued by governments and their agencies, state and provincial governmental entities and supranational organisations, corporate debt securities, contingent convertible securities, asset-backed securities, notes (including corporate, sovereign, floating and fixed rate notes) and mortgage-backed securities (including covered bonds) and currencies. The Sub-fund can invest in debt instruments that are below investment grade and unrated debt securities. The Sub-fund may invest a maximum of 10% in contingent convertible securities.

The Sub-fund can invest up to 15% in other collective investment schemes to achieve its objective (which may include collective investment schemes which are managed or advised by the ACD or the Specialist Investment Managers).

The Sub-fund can invest in derivatives for the purposes of achieving the investment objective and hedging with the aim of reducing the risk profile of the Sub-fund in accordance with the principles of Efficient Portfolio Management. Derivatives can expose the Scheme Property to a higher degree of risk.

From time-to-time, as the Asset Allocation Manager considers appropriate, additional Specialist Investment Managers may be appointed to take advantage of specific mispricing in certain markets or securities.

Asset Allocation Manager's Report

for the period ended 31 August 2025 (unaudited)

Introduction

This report covers the Brewin Dolphin Investment Funds and their underlying mandates for the 6 months from 28 February 2025 to 31 August 2025.

Market Review

The six-month period to the end of August 2025 saw equity markets edge higher despite the drawdown that followed Liberation Day in April. The 90-day pause on the reciprocal tariffs helped stem the simultaneous selloff of US stocks, treasuries and the US dollar.

Part of the higher moves in US treasury yields reflected concerns on the inflationary impact of tariffs and the elevated federal deficit. More fundamentally, investors are starting to question US fiscal credibility. The actions of the new US administration led investors to move assets away from the US to other areas of the world.

The US Federal Reserve ('the Fed') paused their rate cutting as tariff negotiations proceeded with US trade partners. The resultant effective tariff rate lies somewhere between 15% and 20% for US consumers, which is much more than the rate at the end of 2024 but less than the rate suggested by the Liberation Day figures.

The European Central Bank and Bank of England continued cutting rates over the period as inflation slowed in their respective regions.

Ongoing geopolitical tensions have contributed to the continued strength of the gold price.

Performance Activity and Attribution

The MI Select Managers Alternatives Fund gave a total return of 3.9% over the 6 months to the end of August 2025 (Institutional Accumulation). (Source: FE fundinfo)

The gold position continued its rally, returning 12.7% over the six months. The exposure in the commodity makes up almost a third of the Sub-fund.

Asset Allocation Manager's Report (continue)

for the period ended 31 August 2025 (unaudited)

The Schroder Global Cities Real Estate strategy makes up a fifth of the portfolio and fell a few percentage points over the period. In contrast, the bond-based Muzinich Global Tactical Credits strategy rose by a couple of percentage points although the allocation to this strategy is smaller.

Outlook

The yield spread between corporate and government bonds remains tight and would likely widen in the event that economic growth deteriorates. Recessions are often unpredictable, with 5 of the 8 recessions the US has had since 1970 caused by shocks. Government bonds would very likely outperform corporate bonds in the event a negative shock to growth materialises. With spreads tight, the bond positioning acts as a partial hedge against this recession risk and complements our view on equities.

The global economy is likely to continue expanding, which is consistent with corporate profits going up. There is the potential for Artificial Intelligence ('Al') themes to drive both strong economy wide productivity and continued solid profit gains among the Al pick and shovel plays.

There is an argument to be only modestly positive on equities as there is limited room for cyclical economic growth. Most economies are close to full employment which does not lead to much scope for labour force participation to rise. Meanwhile, US president Trump's immigration clampdown is weighing on labour force growth. The upshot is that there's limited room for job growth, meaning there's limited room for aggregate demand to expand. Furthermore, US equity valuation multiples, concentration risk, growth expectations among the AI plays are all elevated. Finally, the large increase in US tariffs should weigh on global growth and result in higher inflation than would otherwise be the case.

There are still reasons to be mildly positive on gold despite the strong rally. Central banks are expected to continue diversifying their reserve holdings out of the dollar and other developed world currencies. Gold is likely to act as a good hedge against several risks including the impact of tariffs. Whilst most economists believe that the large increase in US tariffs will weigh on growth and result in higher inflation than would otherwise be the case, the magnitude is highly uncertain. If the impact ends up being stronger than the consensus expects, gold should do well.

All investments are ordinary shares or stock units on a regulated securities market unless otherwise stated. The percentages in brackets show the equivalent % holdings as at 28.02.25.

^{*}Collective Investment Schemes permitted under COLL, not listed on any exchange.

[^]At the balance sheet date, all forward currency contracts were executed with one counterparty, Northern Trust Investor Services Limited ('NTISL') for the purpose of Effective Portfolio Management. Collateral obligations on losses or gains for each transaction would be met using cash held by the Custodian.

Portfolio Statement (continue)

as at 31 August 2025 (unaudited)

^^At the balance sheet date, all credit default swap contracts and interest rate swap contracts were executed with two counterparties. The net obligations on losses or gains for each transaction would be met by money held in the collateral account of the counterparty. As at 31 August 2025, the balance of the collateral account held at Morgan Stanley was £5,197,000 and Northern Trust was £1,000 reflecting the anticipated settlement of the positions held.

At the period end the Sub-fund did not hold shares in any other Sub-funds within the MI Brewin Dolphin Investment Funds.

Total purchases for the period: £794,128,970

Net Asset Value and Shares in Issue

as at 31 August 2025 (unaudited)

Class	Net Asset Value	Shares in issue	Net Asset Value per share p	Operating Charge Figure*^
Institutional Income	£1,638,826,448	1,458,263,290	112.38	0.35%
Institutional Accumulation	£20,017,035	16,977,064	117.91	0.35%
Class O Income	£1,061,345	875,229	121.26	0.35%
Class O Accumulation	£107,229	85,926	124.79	0.35%
S Income	£40,177	33,194	121.04	0.35%
S Accumulation	£1,307	1,048	124.71	0.35%

^{*}Operating charges include indirect costs incurred in the maintenance and running of the Sub-fund, as disclosed (but not limited to) the detailed expenses within the Statement of Total Return. Included within this figure are the charges of the underlying funds (synthetic ongoing charge). The figures used within this table have been calculated by annualising the expenses incurred against the average Net Asset Value for the accounting period.

Risk and Reward Profile

The risk and reward indicator table demonstrates where the Sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Sub-fund. The shaded area in the table below shows the Sub-fund's ranking on the risk and reward indicator.

The Sub-fund is ranked 4 because funds of this type have experienced average rises and falls in value in the past. During the year under review the category changed from a 3 to a 4 due to the price volatility of the Sub-fund. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Sub-fund:

- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease or increase.
- Investing in other funds may expose investors to increased risk due to less strict regulations and the use of derivatives. These other funds can themselves invest into assets such as bonds, company shares, cash and currencies. The objectives and risk profiles of these underlying funds may not be fully in line with those of this Sub-fund.
- The Sub-fund may invest in property funds which can be less liquid than other asset classes.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Sub-fund.
- This Sub-fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in losses or gains that are greater than the original amount invested.
- For further risk information please see the Prospectus.

Risk Warning

An investment in a non-UCITS Retail Scheme Open-Ended Investment Company should be regarded as a medium to long-term investment. Investors should be aware that the price of shares and the revenue from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

[^]The Asset Allocation Manager is currently waiving the Allocation charge. The result of ending this waiver will increase the operating charge for the O share class by 0.30% and the S share class by 0.20%.

[^]No group 2 shares held in this distribution period.

Interim period: 01.03.25 - 31.08.25

Group 1: Shares purchased prior to a distribution period Group 2: Shares purchased during a distribution period

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents accrued revenue included in the purchase price of the shares. After averaging, it is returned with the distribution as a capital repayment. It is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

Investment Objective

The Sub-fund will aim to provide income along with an opportunity for capital growth.

Investment Policy

The Sub-fund will be invested primarily in a range of global direct debt securities issued by governments and their agencies, state and provincial governmental entities and supranational organisations, corporate debt securities, asset-backed securities and mortgage-backed securities (including covered bonds) and currencies.

The Sub-fund may invest in below investment grade and unrated debt securities.

The Sub-fund may also invest in UCITS and other eligible collective investment schemes to achieve its objective.

The Sub-fund may invest (at the Investment Managers' discretion) in other transferable securities, money market instruments, depositary receipts, derivative instruments and forward transactions.

The Sub-fund may invest in other Funds of the Company and, from time to time, in collective investment schemes which are managed or advised by the ACD.

The Sub-fund may invest in derivatives for the purposes of hedging with the aim of reducing the risk profile of the Sub-fund in accordance with the principles of Efficient Portfolio Management. Derivatives may also be used for investment purposes. Derivatives can expose the Scheme Property to a higher degree of risk.

The Sub-fund can use financial derivative instruments in accordance with the Rules for the purpose of achieving the investment objective.

From time-to-time, as the Asset Allocation Manager considers appropriate, additional Specialist Investment Managers may be appointed to take advantage of specific mispricing in certain markets or securities.

Asset Allocation Manager's Report

for the period ended 31 August 2025 (unaudited)

Introduction

This report covers the MI Brewin Dolphin Investment Funds and their underlying mandates for the 6 months from 28 February 2025 to 31 August 2025.

Market Review

The six-month period to the end of August 2025 saw equity markets edge higher despite the drawdown that followed Liberation Day in April. The 90-day pause on the reciprocal tariffs helped stem the simultaneous selloff of US stocks, treasuries and the US dollar.

Part of the higher moves in US treasury yields reflected concerns on the inflationary impact of tariffs and the elevated federal deficit. More fundamentally, investors are starting to question US fiscal credibility. The actions of the new US administration led investors to move assets away from the US to other areas of the world.

The US Federal Reserve ('the Fed') paused their rate cutting as tariff negotiations proceeded with US trade partners. The resultant effective tariff rate lies somewhere between 15% and 20% for US consumers, which is much more than the rate at the end of 2024 but less than the rate suggested by the Liberation Day figures.

The European Central Bank and Bank of England continued cutting rates over the period as inflation slowed in their respective regions.

Ongoing geopolitical tensions have contributed to the continued strength of the gold price.

Performance Activity and Attribution

The MI Select Managers Bond Fund has given a total return of 1.4% over the six months to the end of August 2025 (Institutional Accumulation), marginally underperforming the benchmark which returned 1.5%. The benchmark comprises 55% Morningstar Global Treasury Bond GR Hedged GBP Index and 45% Morningstar Global Corporate Bond GR Hedged GBP Index. (Source: FE fundinfo)

The Colchester Global Sovereign Bond strategy returned 2.2% outperforming the MorningStar Global Treasury Bond Index (0.9%) helped by their bond selection and overweight position in Mexico.

The performance of the more interest rate sensitive Insight UK Government All Maturities strategy was in line with the MorningStar Gilt Index (-0.6%). The UK gilt allocation was further increased from global sovereigns as the probability of a rate cut increased in the region.

MI Select Managers Bond Fund

Asset Allocation Manager's Report (continue)

for the period ended 31 August 2025 (unaudited)

The inflation linked exposure managed by DWS switched to replicate the global inflation linked index from mid-June after having focused solely on US TIPS. The attractiveness of US inflation protection diminished relative to the global index. The portfolio was relatively flat over the six-month period. Inflation protection exposure was increased slightly from global sovereigns also as tariffs increase the inflation likelihood.

The Man GLG Sterling Corporate Bond strategy returned 4.2%, strongly outperforming the broader based MorningStar UK Corporate Bond Index (1.2%). The Man GLG investment is a high conviction strategy managed by Jonathan Golan, who has built a successful track record in a variety of market conditions. The strategy consists of bonds where the yield greatly compensates for the default risk, bonds with a strong individual credit improvement story as well as smaller and more under-researched issuers.

The MorningStar Global Corporate Bond Index returned 1.2% over the reporting period. Robeco Global Credits provided the broad-based global credit exposure until mid-July (0.6%) when the position was replaced with the Osmosis Global Credit fund (1.6%) and the BNY Global Credit strategy (1.6%). The former Robeco team runs the Osmosis strategy using the same investment process. The BNY Global Credit strategy has robust investment processes which is underpinned by a deeply resourced and stable team.

We are pleased with the performance of the Sub-fund over the period and believe that it is well positioned in the current market environment.

Outlook

The yield spread between corporate and government bonds remains tight and would likely widen in the event that economic growth deteriorates. Recessions are often unpredictable, with 5 of the 8 recessions the US has had since 1970 caused by shocks. Government bonds would very likely outperform corporate bonds in the event a negative shock to growth materialises. With spreads tight, the bond positioning acts as a partial hedge against this recession risk and complements our view on equities.

The global economy is likely to continue expanding, which is consistent with corporate profits going up. There is the potential for Artificial Intelligence ('Al') themes to drive both strong economy wide productivity and continued solid profit gains among the Al pick and shovel plays.

There is an argument to be only modestly positive on equities as there is limited room for cyclical economic growth. Most economies are close to full employment which does not lead to much scope for labour force participation to rise. Meanwhile, US president Trump's immigration clampdown is weighing on labour force growth. The upshot is that there's limited room for job growth, meaning there's limited room for aggregate demand to expand. Furthermore, US equity valuation multiples, concentration risk, growth expectations among the AI plays are all elevated. Finally, the large increase in US tariffs should weigh on global growth and result in higher inflation than would otherwise be the case.

There are still reasons to be mildly positive on gold despite the strong rally. Central banks are expected to continue diversifying their reserve holdings out of the dollar and other developed world currencies. Gold is likely to act as a good hedge against several risks including the impact of tariffs. Whilst most economists believe that the large increase in US tariffs will weigh on growth and result in higher inflation than would otherwise be the case, the magnitude is highly uncertain. If the impact ends up being stronger than the consensus expects, gold should do well.

Portfolio Statement (continue)

as at 31 August 2025 (unaudited)

All investments are ordinary shares or stock units on a regulated securities market unless otherwise stated. The percentages in brackets show the equivalent % holdings as at 28.02.25.

^At the balance sheet date, all forward currency contracts were executed with one counterparty, Northern Trust Investor Services Limited ('NTISL') for the purpose of Effective Portfolio Management. Collateral obligations on losses or gains for each transaction would be met using cash held by the Custodian.

^^At the balance sheet date, credit default swap contracts and interest rate swap contracts were executed with multiple counterparties. The net obligations on losses or gains for each transaction would be met by money held in the collateral account of the counterparty. As at 31 August 2025, the balance of the collateral account held at BNP was £1,534,333, Barclays was £2,080,000, Citibank was £692,888, JP Morgan was £18,164,589, Northern Trust was (£41,601), Standard Chartered Bank was (£2,377,150) and UBS was (£319,429) reflecting the anticipated settlement of the positions held.

At the period end the Sub-fund did not hold shares in any other Sub-funds within the MI Brewin Dolphin Investment Funds.

Total purchases for the period: £2,903,476,638
Total sales for the period: £2,593,089,430

S Accumulation	£1,200	1,047	114.61	0.23%

^{*}Operating charges include indirect costs incurred in the maintenance and running of the Sub-fund, as disclosed (but not limited to) the detailed expenses within the Statement of Total Return included within this figure are the charges of the underlying funds (synthetic ongoing charge). The figures used within this table have been calculated by annualising the expenses incurred against the average Net Asset Value for the accounting period.

Risk and Reward Profile

The risk and reward indicator table demonstrates where the Sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Sub-fund. The shaded area in the table below shows the Sub-fund's ranking on the risk and reward indicator.

The Sub-fund is ranked 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Sub-fund:

- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Sub-fund.
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease or increase.
- This Sub-fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in losses or gains that are greater than the original amount invested.
- The level of income may go down as well as up and is not guaranteed.
- For further risk information please see the Prospectus.

Risk Warning

An investment in a non-UCITS Retail Scheme Open-Ended Investment Company should be regarded as a medium to long-term investment. Investors should be aware that the price of shares and the revenue from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

[^]The Asset Allocation Manager is currently waiving the Allocation charge. The result of ending this waiver will increase the operating charge for the O share class by 0.30% and the S share class by 0.20%.

First interim period: 01.03.25 - 31.05.25 Second interim period: 01.06.25 - 31.08.25

Group 1: Shares purchased prior to a distribution period Group 2: Shares purchased during a distribution period

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents accrued revenue included in the purchase price of the shares. After averaging, it is returned with the distribution as a capital repayment. It is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

Investment Objective

The Sub-fund will aim to achieve long term capital growth and income.

Investment Policy

The Sub-fund will primarily invest directly in a diverse range of North American listed equities but can also invest indirectly through investment funds targeted towards American equity.

The Sub-fund may also invest a small proportion in non- North American investments with a correlation to the North American market in order to achieve its investment objective.

North American listed equities are defined as those that are issued mainly by companies domiciled, incorporated or have a significant part of their business in the USA, but also in Canada and Mexico. It may include other North American related investments. The indirect exposure of the Sub-fund to the equities will be made via index-tracking instruments such as exchange traded funds, index tracking funds and other collective investment schemes.

The Sub-fund may invest (at the Investment Managers' discretion) in other transferable securities, money market instruments, depositary receipts, derivative instruments and forward transactions.

The Sub-fund may invest in other Funds of the Company and, from time to time, in collective investment schemes which are managed or advised by the ACD.

The Sub-fund may invest in derivatives for the purposes of hedging with the aim of reducing the risk profile of the Sub-fund in accordance with the principles of Efficient Portfolio Management. Derivatives may also be used for investment purposes. Derivatives can expose the Scheme Property to a higher degree of risk.

The Sub-fund can use financial derivative instruments in accordance with the Rules for the purpose of achieving the investment objective.

From time-to-time, as the Asset Allocation Manager considers appropriate, additional Specialist Investment Managers may be appointed to take advantage of specific mispricing in certain markets or securities.

Asset Allocation Manager's Report

for the period ended 31 August 2025 (unaudited)

Introduction

This report covers the Brewin Dolphin Investment Funds and their underlying mandates for the 6 months from 28 February 2025 to 31 August 2025.

Market Review

The six-month period to the end of August 2025 saw equity markets edge higher despite the drawdown that followed Liberation Day in April. The 90-day pause on the reciprocal tariffs helped stem the simultaneous selloff of US stocks, treasuries and the US dollar.

Part of the higher moves in US treasury yields reflected concerns on the inflationary impact of tariffs and the elevated federal deficit. More fundamentally, investors are starting to question US fiscal credibility. The actions of the new US administration led investors to move assets away from the US to other areas of the world.

The US Federal Reserve ('the Fed') paused their rate cutting as tariff negotiations proceeded with US trade partners. The resultant effective tariff rate lies somewhere between 15% and 20% for US consumers, which is much more than the rate at the end of 2024 but less than the rate suggested by the Liberation Day figures.

The European Central Bank and Bank of England continued cutting rates over the period as inflation slowed in their respective regions.

Ongoing geopolitical tensions have contributed to the continued strength of the gold price.

Performance Activity and Attribution

The MI Select Managers North American Equity Fund gave a total return of 3.9% over the 6 months to the end of August 2025 (Institutional Accumulation), outperforming the broad measures of North American equity such as the MorningStar US Market index which returned 1.8%. (Source: FE fundinfo)

The Baillie Gifford American strategy is a firmly growth-oriented strategy with high exposure to technology stocks. The portfolio outperformed strongly over the previous six months with a return approaching 10%. The allocation to this strategy remains small to manage the volatility in the wider portfolio.

Asset Allocation Manager's Report (continue)

for the period ended 31 August (unaudited)

The DWS US Quality Growth strategy has similar exposures to the NASDAQ 100 Index and is therefore dominated by the largest technology companies in the US. The exposure held up well relative to the active managers over the period, rising almost 5%.

The large cap, diversified, core growth strategy of Brown Advisory Sustainable US Growth was a drag on performance over the six-month period, coming in relatively flat over the period. Qualities the Brown Advisory team look for in businesses include strong and experienced management teams, leadership positions in industries with high barriers to entry, highly visible revenue streams and good capital allocation decisions made over time. A large part of performance was driven by their holding in Trade Desk which negatively impacted returns. Whilst the performance of the holding was disappointing, we have confidence in the strategy and over the longer term, we believe Brown Advisory can help generate outperformance within US growth companies.

The BNY Mellon US Equity Income strategy has a cyclical value approach with an income focus. The strategy underperformed the broader market by a couple of percentage points but the income focus helped outperform the pure value index.

The DWS US Value strategy provides the ability to capture the US value factor exposure without an income bias. The strategy struggled in this six-month period, falling a few percentage points.

We believe this complementary blend of strategies will provide investors with attractive long-term performance.

Outlook

The yield spread between corporate and government bonds remains tight and would likely widen in the event that economic growth deteriorates. Recessions are often unpredictable, with 5 of the 8 recessions the US has had since 1970 caused by shocks. Government bonds would very likely outperform corporate bonds in the event a negative shock to growth materialises. With spreads tight, the bond positioning acts as a partial hedge against this recession risk and complements our view on equities.

The global economy is likely to continue expanding, which is consistent with corporate profits going up. There is the potential for Artificial Intelligence ('Al') themes to drive both strong economy wide productivity and continued solid profit gains among the Al pick and shovel plays.

There is an argument to be only modestly positive on equities as there is limited room for cyclical economic growth. Most economies are close to full employment which does not lead to much scope for labour force participation to rise. Meanwhile, US president Trump's immigration clampdown is weighing on labour force growth. The upshot is that there's limited room for job growth, meaning there's limited room for aggregate demand to expand. Furthermore, US equity valuation multiples, concentration risk, growth expectations among the AI plays are all elevated. Finally, the large increase in US tariffs should weigh on global growth and result in higher inflation than would otherwise be the case.

There are still reasons to be mildly positive on gold despite the strong rally. Central banks are expected to continue diversifying their reserve holdings out of the dollar and other developed world currencies. Gold is likely to act as a good hedge against several risks including the impact of tariffs. Whilst most economists believe that the large increase in US tariffs will weigh on growth and result in higher inflation than would otherwise be the case, the magnitude is highly uncertain. If the impact ends up being stronger than the consensus expects, gold should do well.

All investments are ordinary shares or stock units on a regulated securities market unless otherwise stated. The percentages in brackets show the equivalent % holdings as at 28.02.25.

At the period end the Sub-fund did not hold shares in any other Sub-funds within the MI Brewin Dolphin Investment Funds.

Total purchases for the period: £913,762,558
Total sales for the period: £924,117,807

[^]This is a delisted security and has been valued at the ACD's best assessment of its fair value.

^{^^}At the balance sheet date, all forward currency contracts were executed with one counterparty, Northern Trust Investor Services Limited (NTISL) for the purpose of Effective Portfolio Management. Collateral obligations on losses or gains for each transaction would be met using cash held by the Custodian.

Net Asset Value and Shares in Issue

as at 31 August 2025 (unaudited)

Class	Net Asset Value	Shares in issue	Net Asset Value per share p	Operating Charge Figure*^
Institutional Income	£3,312,770,452	1,329,552,905	249.16	0.24%
Institutional Accumulation	£59,160,758	26,024,787	227.32	0.24%

O Accumulation	£140,911	104,441	134.92	0.24%
S Income	£91,141	68,709	132.65	0.24%
S Accumulation	£1,407	1,044	134.77	0.24%

^{*}Operating charges include indirect costs incurred in the maintenance and running of the Sub-fund, as disclosed (but not limited to) the detailed expenses within the Statement of Total Return. Included within this figure are the charges of the underlying funds (synthetic ongoing charge). The figures used within this table have been calculated by annualising the expenses incurred against the average Net Asset Value for the accounting period.

Risk and Reward Profile

The risk and reward indicator table demonstrates where the Sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Sub-fund. The shaded area in the table below shows the Sub-fund's ranking on the risk and reward indicator.

The Sub-fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Sub-fund:

- As this Sub-fund is focused on a single geographical region, it will have greater exposure to the market, political and economic risks of that region than if it was more diversified across several countries.
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease or increase.
- This Sub-fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in losses or gains that are greater than the original amount invested.
- For further risk information please see the Prospectus.

Risk Warning

An investment in a non-UCITS Retail Scheme Open-Ended Investment Company should be regarded as a medium to long-term investment. Investors should be aware that the price of shares and the revenue from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

[^]The Asset Allocation Manager is currently waiving the Allocation charge. The result of ending this waiver will increase the operating charge for the O share class by 0.30% and the S share class by 0.20%.

S Accumulation	Interim	Group 1 Group 2^	0.4839 0.4839	-	0.4839 0.4839	0.4904 0.4904

[^]No group 2 shares held in this distribution period.

Interim period: 01.03.25 - 31.08.25

Group 1: Shares purchased prior to a distribution period Group 2: Shares purchased during a distribution period

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents accrued revenue included in the purchase price of the shares. After averaging, it is returned with the distribution as a capital repayment. It is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

Investment Objective

The Sub-fund will aim to achieve long term capital growth and income.

Investment Policy

The Sub-fund will primarily invest directly in a diverse range of UK listed equities but can also invest indirectly through investment funds targeted towards UK equity. The Sub-fund may also invest a small proportion in non-UK investments to achieve its investment objective.

UK listed equities are defined as those that are issued by companies that are domiciled or listed in the UK, and may include small and micro-cap stocks which generally pose a higher investment risk than larger stocks. The indirect exposure of the Sub-fund to the equities will be made via index-tracking instruments such as exchange traded funds, index tracking funds and other Collective Investment Schemes.

The Sub-fund may invest in other Funds of the Company and, from time to time, in collective investment schemes which are managed or advised by the ACD.

The Sub-fund may invest (at the Investment Managers' discretion) in other transferable securities, money market instruments, depositary receipts, derivative instruments and forward transactions.

The Sub-fund may invest in derivatives for the purposes of hedging with the aim of reducing the risk profile of the Sub-fund in accordance with the principles of Efficient Portfolio Management. Derivatives may also be used for investment purposes. Derivatives can expose the Scheme Property to a higher degree of risk.

The Sub-fund can use financial derivative instruments in accordance with the Rules for the purpose of achieving the investment objective.

From time-to-time, as the Asset Allocation Manager considers appropriate, additional Specialist Investment Managers may be appointed to take advantage of specific mispricing in certain markets or securities.

Asset Allocation Manager's Report

for the period ended 31 August 2025 (unaudited)

Introduction

This report covers the MI Brewin Dolphin Investment Funds and their underlying mandates for the 6 months from 28 February 2025 to 31 August 2025.

Market Review

The six-month period to the end of August 2025 saw equity markets edge higher despite the drawdown that followed Liberation Day in April. The 90-day pause on the reciprocal tariffs helped stem the simultaneous selloff of US stocks, treasuries and the US dollar.

Part of the higher moves in US treasury yields reflected concerns on the inflationary impact of tariffs and the elevated federal deficit. More fundamentally, investors are starting to question US fiscal credibility. The actions of the new US administration led investors to move assets away from the US to other areas of the world.

The US Federal Reserve ('the Fed') paused their rate cutting as tariff negotiations proceeded with US trade partners. The resultant effective tariff rate lies somewhere between 15% and 20% for US consumers, which is much more than the rate at the end of 2024 but less than the rate suggested by the Liberation Day figures.

The European Central Bank and Bank of England continued cutting rates over the period as inflation slowed in their respective regions.

Ongoing geopolitical tensions have contributed to the continued strength of the gold price.

Performance Activity and Attribution

The MI Select Managers UK Equity Fund gave a total return of 6.1% over the six months to the end of August 2025 (Institutional Accumulation), underperforming the MorningStar UK Market which returned 7.1%. (Source: FE fundinfo)

The small cap exposure in Teviot UK Smaller Companies gained 10% and outperformed the broader market in this period, helped by their focus on attractively valued companies.

The Redwheel UK Equity Income strategy strongly outperformed the broader UK market, returning 9.6%. The mandate has a notable exposure in financial companies which aided performance as fundamentals improved for banks in particular.

Asset Allocation Manager's Report (continue)

for the period ended 31 August (unaudited)

The JPM UK Core strategy seeks to add value through a systematic investment process that has exposure to a number of underlying investment styles. The strategy outperformed broader index this period returning 7.8%.

The Lindsell Train strategy underperformed the broader UK market and was relatively flat over the six-month period. The strategy focuses on a select number of firms with strong, simple and defendable business models with a clear path to growing revenues. The Lindsell Train strategy complements the Redwheel exposure well. The strategy remains an important diversifying element within the Sub-fund.

Over the longer term, the Sub-fund has outperformed the benchmark, and we retain confidence that the unique blend of strategies is well positioned to continue to do so over the coming years.

Outlook

The yield spread between corporate and government bonds remains tight and would likely widen in the event that economic growth deteriorates. Recessions are often unpredictable, with 5 of the 8 recessions the US has had since 1970 caused by shocks. Government bonds would very likely outperform corporate bonds in the event a negative shock to growth materialises. With spreads tight, the bond positioning acts as a partial hedge against this recession risk and complements our view on equities.

The global economy is likely to continue expanding, which is consistent with corporate profits going up. There is the potential for Artificial Intelligence ('Al') themes to drive both strong economy wide productivity and continued solid profit gains among the Al pick and shovel plays.

There is an argument to be only modestly positive on equities as there is limited room for cyclical economic growth. Most economies are close to full employment which does not lead to much scope for labour force participation to rise. Meanwhile, US president Trump's immigration clampdown is weighing on labour force growth. The upshot is that there's limited room for job growth, meaning there's limited room for aggregate demand to expand. Furthermore, US equity valuation multiples, concentration risk, growth expectations among the AI plays are all elevated. Finally, the large increase in US tariffs should weigh on global growth and result in higher inflation than would otherwise be the case.

There are still reasons to be mildly positive on gold despite the strong rally. Central banks are expected to continue diversifying their reserve holdings out of the dollar and other developed world currencies. Gold is likely to act as a good hedge against several risks including the impact of tariffs. Whilst most economists believe that the large increase in US tariffs will weigh on growth and result in higher inflation than would otherwise be the case, the magnitude is highly uncertain. If the impact ends up being stronger than the consensus expects, gold should do well.

All investments are ordinary shares or stock units on a regulated securities market unless otherwise stated. The percentages in brackets show the equivalent % holdings as at 28.02.25.

At the period end the Sub-fund did not hold shares in any Sub-funds within the MI Brewin Dolphin Investment Funds.

Total purchases for the period: £285,352,194
Total sales for the period: £245,188,845

[^]This is a delisted security and has been valued at the ACD's best assessment of its fair value.

^{*}Quoted on AIM.

^{**}Collective Investment Schemes permitted under COLL, not listed on any exchange.

[†]Represents investment into a related party of the Specialist Investment Manager to the Asset Allocation Manager.

Net Asset Value and Shares in Issue

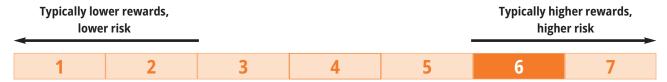

as at 31 August 2025 (unaudited)

Class	Net Asset Value	Shares in issue	Net Asset Value per share p	Operating Charge Figure*^
Institutional Income	£1,087,085,848	847,059,640	128.34	0.41%
Institutional Accumulation	£4,312,854	2,949,287	146.23	0.41%
O Income	£604,848	486,695	124.28	0.41%
O Accumulation	£57,204	43,549	131.36	0.41%
S Income	£16,861	13,560	124.34	0.41%
S Accumulation	£1,377	1,047	131.52	0.41%

^{*}Operating charges include indirect costs incurred in the maintenance and running of the Sub-fund, as disclosed (but not limited to) the detailed expenses within the Statement of Total Return. Included within this figure are the charges of the underlying funds (synthetic ongoing charge). The figures used within this table have been calculated by annualising the expenses incurred against the average Net Asset Value for the accounting period.

Risk and Reward Profile

The risk and reward indicator table demonstrates where the Sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Sub-fund. The shaded area in the table below shows the Sub-fund's ranking on the risk and reward indicator.

The Sub-fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Sub-fund:

- As this Sub-fund is focused on a single geographical region, it will have greater exposure to the market, political and economic risks of that region than if it was more diversified across several countries.
- This Sub-fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in losses or gains that are greater than the original amount invested.
- The level of income may go down as well as up and is not guaranteed.
- For further risk information please see the Prospectus.

Risk Warning

An investment in a non-UCITS Retail Scheme Open-Ended Investment Company should be regarded as a medium to long-term investment. Investors should be aware that the price of shares and the revenue from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

[^]The Asset Allocation Manager is currently waiving the Allocation charge. The result of ending this waiver will increase the operating charge for the O share class by 0.30% and the S share class by 0.20%.

[^]No Group 2 shares held in these distribution periods.

Interim period: 01.03.25 - 31.08.25

Group 1: Shares purchased prior to a distribution period Group 2: Shares purchased during a distribution period

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents accrued revenue included in the purchase price of the shares. After averaging, it is returned with the distribution as a capital repayment. It is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

Investment Objective

The Sub-fund will aim to provide income along with an opportunity for long term capital appreciation.

Investment Policy

The Sub-fund will primarily invest directly in a diverse range of UK listed equities but can also invest indirectly through investment funds targeted towards UK equity with an emphasis on those which produce a sustainable dividend yield. The Sub-fund may also invest a small proportion in non-UK investments to achieve its investment objective.

UK listed equities are defined as those that are issued by companies that are domiciled or listed in the UK, and may include small and micro-cap stocks which generally pose a higher investment risk than larger stocks. The indirect exposure of the Sub-fund to the equities will be made via index-tracking instruments such as exchange traded funds, index tracking funds and other Collective Investment Schemes.

The Sub-fund may invest (at the Investment Managers' discretion) in other transferable securities, money market instruments, depositary receipts, derivative instruments and forward transactions.

The Sub-fund may invest in other Sub-funds of the Company and, from time to time, in Collective Investment Schemes which are managed or advised by the ACD.

The Sub-fund may invest in derivatives for the purposes of hedging with the aim of reducing the risk profile of the Sub-fund in accordance with the principles of Efficient Portfolio Management. Derivatives may also be used for investment purposes. Derivatives can expose the Scheme Property to a higher degree of risk.

The Sub-fund can use financial derivative instruments in accordance with the Rules for the purpose of achieving the investment objective.

From time-to-time, as the Asset Allocation Manager considers appropriate, additional Specialist Investment Managers may be appointed to take advantage of specific mispricing in certain markets or securities.

Asset Allocation Manager's Report

for the period ended 31 August 2025 (unaudited)

Introduction

This report covers the MI Brewin Dolphin Investment Funds and their underlying mandates for the 6 months from 28 February 2025 to 31 August 2025.

Market Review

The six-month period to the end of August 2025 saw equity markets edge higher despite the drawdown that followed Liberation Day in April. The 90-day pause on the reciprocal tariffs helped stem the simultaneous selloff of US stocks, treasuries and the US dollar.

Part of the higher moves in US treasury yields reflected concerns on the inflationary impact of tariffs and the elevated federal deficit. More fundamentally, investors are starting to question US fiscal credibility. The actions of the new US administration led investors to move assets away from the US to other areas of the world.

The US Federal Reserve ('the Fed') paused their rate cutting as tariff negotiations proceeded with US trade partners. The resultant effective tariff rate lies somewhere between 15% and 20% for US consumers, which is much more than the rate at the end of 2024 but less than the rate suggested by the Liberation Day figures.

The European Central Bank and Bank of England continued cutting rates over the period as inflation slowed in their respective regions.

Ongoing geopolitical tensions have contributed to the continued strength of the gold price.

Performance Activity and Attribution

The MI Select Managers UK Equity Income Fund gave a total return of 6.4% over the six months to the end of August 2025 (Institutional Accumulation), underperforming the broader MorningStar UK Market which returned 7.1%. (Source: FE fundinfo)

The income biased strategies underperformed the broader UK market. The Man GLG UK Equity Income and Threadneedle Equity Income performed similarly and slight better than Ninety One UK Equity Income, which lagged the other active managers as companies with dependable cash flows fell out of favour with investors.

Over the longer term, the Sub-fund has outperformed the benchmark and we retain confidence that the unique blend of strategies is well positioned to continue to do so over the coming years.

Asset Allocation Manager's Report (continue)

for the period ended 31 August (unaudited)

Outlook

The yield spread between corporate and government bonds remains tight and would likely widen in the event that economic growth deteriorates. Recessions are often unpredictable, with 5 of the 8 recessions the US has had since 1970 caused by shocks. Government bonds would very likely outperform corporate bonds in the event a negative shock to growth materialises. With spreads tight, the bond positioning acts as a partial hedge against this recession risk and complements our view on equities.

The global economy is likely to continue expanding, which is consistent with corporate profits going up. There is the potential for Artificial Intelligence ('Al') themes to drive both strong economy wide productivity and continued solid profit gains among the Al pick and shovel plays.

There is an argument to be only modestly positive on equities as there is limited room for cyclical economic growth. Most economies are close to full employment which does not lead to much scope for labour force participation to rise. Meanwhile, US president Trump's immigration clampdown is weighing on labour force growth. The upshot is that there's limited room for job growth, meaning there's limited room for aggregate demand to expand. Furthermore, US equity valuation multiples, concentration risk, growth expectations among the AI plays are all elevated. Finally, the large increase in US tariffs should weigh on global growth and result in higher inflation than would otherwise be the case.

There are still reasons to be mildly positive on gold despite the strong rally. Central banks are expected to continue diversifying their reserve holdings out of the dollar and other developed world currencies. Gold is likely to act as a good hedge against several risks including the impact of tariffs. Whilst most economists believe that the large increase in US tariffs will weigh on growth and result in higher inflation than would otherwise be the case, the magnitude is highly uncertain. If the impact ends up being stronger than the consensus expects, gold should do well.

All investments are ordinary shares or stock units on a regulated securities market unless otherwise stated. The percentages in brackets show the equivalent % holdings as at 28.02.25.

At the period end the Sub-fund did not hold shares in any other Sub-funds within the MI Brewin Dolphin Investment Funds.

Total purchases for the period: £187,927,148
Total sales for the period: £183,522,970

^{*}Quoted on AIM

^{**}Collective Investment Schemes permitted under COLL, not listed on any exchange.

[†]Represents investment into a related party of the Specialist Investment Manager to the Asset Allocation Manager.

[^]This is suspended securities and have been valued at the Manager's best assessment of its fair value.

^{^^}At the balance sheet date, all forward currency contracts were executed with one counterparty, Northern Trust Investor Services Limited for the purpose of Effective Portfolio Management. Collateral obligations on losses or gains for each transaction would be met using cash held by the Custodian.

Net Asset Value and Shares in Issue

as at 31 August 2025 (unaudited)

Class	Net Asset Value	Shares in issue	Net Asset Value per share p	Operating Charge Figure*^
Institutional Income	£575,205,693	460,540,855	124.90	0.48%
Institutional Accumulation	£3,149,244	2,012,551	156.48	0.48%
O Income	£204,751	163,423	125.29	0.48%
O Accumulation	£59,837	43,974	136.07	0.48%
S Income	£30,522	24,361	125.29	0.48%
S Accumulation	£1,421	1,045	135.98	0.48%

^{*}Operating charges include indirect costs incurred in the maintenance and running of the Sub-fund, as disclosed (but not limited to) the detailed expenses within the Statement of Total Return. Included within this figure are the charges of the underlying funds (synthetic ongoing charge). The figures used within this table have been calculated by annualising the expenses incurred against the average Net Asset Value for the accounting period.

Risk and Reward Profile

The risk and reward indicator table demonstrates where the Sub-fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Sub-fund. The shaded area in the table below shows the Sub-fund's ranking on the risk and reward indicator.

The Sub-fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past. During the year under review the category changed from a 6 to a 5 due to the price volatility of the Sub-fund. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.

- As this Sub-fund is focused on a single geographical region, it will have greater exposure to the market, political and economic risks of that region than if it was more diversified across several countries.
- This Sub-fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in losses or gains that are greater than the original amount invested.
- The level of income may go down as well as up and is not guaranteed.
- For further risk information please see the Prospectus.

Risk Warning

An investment in a non-UCITS Retail Scheme Open-Ended Investment Company should be regarded as a medium to long-term investment. Investors should be aware that the price of shares and the revenue from them can fall as well as rise and investors may not receive back the full amount invested. Past performance is not a guide to future performance. Investments denominated in currencies other than the base currency are subject to fluctuation in exchange rates, which can be favourable or unfavourable.

[^]The Asset Allocation Manager is currently waiving the Allocation charge. The result of ending this waiver will increase the operating charge for the O share class by 0.30% and the S share class by 0.20%.

Statement of Total Return

[^]No Group 2 shares held in these distribution periods.

First interim period: 01.03.25 - 31.05.25 Second interim period: 01.06.25 - 31.08.25

Group 1: Shares purchased prior to a distribution period Group 2: Shares purchased during a distribution period

Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents accrued revenue included in the purchase price of the shares. After averaging, it is returned with the distribution as a capital repayment. It is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

MI Brewin Dolphin Investment Funds

General Information

Authorised status and structure of the Company

MI Brewin Dolphin Investment Funds (the 'Company') is structured as an Investment Company with Variable Capital ('ICVC'), under regulation 12 (Authorisation) of the OEIC Regulations (Open-Ended Investment Companies Regulations 2001 (SI 2001/1228)).

The Company does not intend to have an interest in immovable property.

The Company is authorised and regulated in the UK by the Financial Conduct Authority ('FCA') as a non-UCITS Retail Scheme and under the COLL Sourcebook.

The Company was incorporated in England and Wales on 21 December 2017 under registration number IC001104. The Shareholders are not liable for the debts of the Company.

The Company currently has 5 Sub-funds, which are detailed below:

MI Select Managers Alternatives Fund

MI Select Managers Bond Fund

MI Select Managers North American Equity Fund

MI Select Managers UK Equity Fund

MI Select Managers UK Equity Income Fund

Head Office

Hamilton Centre, Rodney Way, Chelmsford, Essex CM1 3BY

Address for Service

The Head Office is the address in the United Kingdom for service on the Company of notices or other documents required or authorised to be served on it.

Base Currency

The base currency of the Company is Pounds Sterling.

Share Capital

The minimum share capital of the Company is £1 and the maximum is £100,000,000,000. Shares in the Company have no par value. The share capital of the Company at all times equals the sum of the Net Asset Value of the Sub-funds.

Classes of Shares

The Instrument of Incorporation allows each Company to issue different classes of shares in respect of any Sub-fund.

The Sub-funds currently have the following classes of shares available for investment:

	Share Class							
Sub-fund	Institutional Income	Institutional Accumulation	O Income	O Accumulation	S Income	S Accumulation		
Alternatives Fund	V	~	V	~	~	~		
Bond Fund	V	~	V	~	V	~		
North American Equity Fund	V	~	V	~	✓	~		
UK Equity Fund	V	~	V	~	V	~		
UK Equity Income Fund	V	~	V	~	✓	~		

The Company may issue both Income and Accumulation Shares.

Holders of Income shares are entitled to be paid the revenue attributable to such shares in respect of each annual accounting period in the currency of the relevant share class.

Holders of Accumulation shares are not entitled to be paid the revenue attributable to such shares, but that revenue is retained and accumulated for the benefit of Shareholders and is reflected in the price of shares.

MI Brewin Dolphin Investment Funds

General Information (continued)

Valuation Point

The scheme property of the Company and each Sub-fund will normally be valued at 12:00 on each dealing day for the purpose of calculating the price at which shares in the Company may be issued, sold, repurchased, or redeemed.

For the purpose of the pricing of shares, a business day is defined as a day on which the dealing office of the ACD is open for the buying and selling of shares. The ACD may at any time during a business day carry out an additional valuation of the property of the Sub-fund if the ACD considers it desirable to do so, with the Depositary's approval.

Buying, Redeeming and Switching of Shares

The ACD will accept orders for the purchase, sale and switching of shares on normal business days between 08:30 and 16:30. Instructions to buy or sell shares may either be in writing to:

Hamilton Centre, Rodney Way, Chelmsford, Essex CM1 3BY

Or by telephone to: 0345 872 4982

The ACD has the right to establish facilities for recording telephone calls made or received on this telephone line.

A contract note giving details of the shares purchased will be issued no later than the next business day after the business day on which an application to purchase shares is received and instrumented by the ACD. Certificates will not be issued in respect of shares. Ownership of shares will be evidenced by an entry on the register of Shareholders.

Pricing Basis

There is a single price for buying, selling, and switching shares for each share class in a Sub-fund which represents the Net Asset Value of the share class concerned. The share price is calculated on a forward pricing basis, that is at the next Valuation Point after the purchase or redemption is deemed to be accepted by the ACD.

The prices of shares are published daily on www.fundrock.com. Neither the ACD nor the Company can be held responsible for any errors in the publication of the prices. The shares in the Company will be issued and redeemed on a forward pricing basis which means that the price will not necessarily be the same as the published price.

Report

The annual report of the Company will be published no later than four months from the end of each annual accounting period.

Interim Financial Statements period end: 31 August

Annual Financial Statements year end: 28/29 February

Distribution Payment Dates

Interim: 31 May / 31 August / 30 November for the following MI Brewin Dolphin

Investment Funds:

MI Select Managers Bond Fund

MI Select Managers UK Equity Income Fund

31 August for the following MI Brewin Dolphin Investment Funds:

MI Select Managers Alternatives Fund

MI Select Managers North American Equity Fund

MI Select Managers UK Equity Fund

Annual: 28/29 February

Other Information

The Instrument of Incorporation, Prospectus, Key Investor Information Document, and the most recent interim and annual reports may be inspected at the office of the Company which is also the Head Office of the Company. Copies may be obtained free of charge upon application. They are also available from the website of the Company, the details of which are given in the directory of this report.

Shareholders who have complaints about the operation of the Company should in the first instance contact the ACD, or, following that, may make their complaint direct to the Financial Ombudsman Service, Exchange Tower, London E14 9SR.

MI Brewin Dolphin Investment Funds

General Information (continued)

Significant Information

The ACD has assessed implications of current world geopolitical tensions and conflicts. The current crises have and will have a wider impact in terms of market performance.

Task Force on Climate-Related Financial Disclosures ('TCFD')

The ACD is required to publish a public TCFD product report in respect of each Sub-fund. The report is designed to provide investors with transparency into their portfolios' climate-related risks and opportunities according to the recommendations from the TCFD and aims to help investors understand their exposure to these risks and opportunities.

Reports for each Sub-fund are published on www.fundrock.com/mi-funds/ and can be found under Task Force on Climate-Related Financial Disclosures ('TCFD') by selecting the relevant Fund Manager and Sub-fund.

Data Protection Policy

The way in which we may use personal information of individuals ("personal data") is governed by the "Data Protection Requirements" which means all applicable data protection laws and regulations including, without limitation, (a) the General Data Protection Regulation (EU) 2016/679 ("GDPR"), (b) UK GDPR (as that term is defined by the Data Protection, Privacy and Electronic Communications (Amendments etc.) (EU Exit) Regulations 2019) and the Data Protection Act 2018, and (c) any legislation that supplements or replaces the foregoing in the UK. The Data Protection Requirements are designed to strengthen data protection for all individuals.
