

# Fund Update

For the quarter ended 31 December 2022

- **Antipodes Investment Funds**
- **Antipodes Global Fund (PIE)**

This fund update was first made publicly available on: 10 February 2023

## What is the purpose of this update?

This document tells you how the Antipodes Global Fund (PIE) has performed and what fees were charged. The document will help you to compare the fund with other funds. Implemented Investment Solutions Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

## Description of this fund

**Objective:** The objective of the fund is to achieve absolute returns in excess of the MSCI All Country World Net Index in NZ dollars over the investment cycle (typically 3-5 years).

**Strategy:** The fund invests in the Antipodes Global Fund - UCITS (Underlying Fund) and cash or cash equivalent securities. The Underlying Fund's investment exposure is predominantly to a broad range of international shares listed on stock exchanges in developed and emerging markets. Derivatives, including equity shorts and currency positions may be used where Antipodes Partners Limited as investment manager sees attractive opportunities and also to offset specific unwanted portfolio risks and provide some protection from unexpectedly large movements in the value of the portfolio. Derivatives may also be used to amplify positions where the Investment Manager feels strongly about the return potential of an idea. In using derivatives, the Underlying Fund's total gross exposure may be leveraged to a maximum of 200% of the Net Asset Value. The Underlying Fund's net exposure will be within a range of 50% to 100% of its Net Asset Value. Given the fund's broad mandate and wide range of tools available, its investment performance will depend, to a larger degree than traditional equity investment funds, on Antipodes' skill in selecting, combining and implementing investment decisions. These features mean that the fund will not be appropriate for all investors. The fund targets a position of being unhedged (to New Zealand dollars).

Total value of the fund	\$NZ 34,844,008
The date the fund started	25 July 2018

## What are the risks of investing?

Risk indicator for the Antipodes Global Fund (PIE)<sup>1</sup>.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

## How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	-2.87%
Annual return (after deductions for charges but before tax)	-1.81%
Market index annual return (reflects no deduction for charges and tax)	-11.63%

The market index return is the MSCI All Country World Net Index in New Zealand dollars. This has been the market index since the inception of the fund. Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2022.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Antipodes Global Fund (PIE) are charged fund charges. In the year to 31 March 2022 these were:

	% of net asset value
Total fund charges (including GST) <sup>2</sup>	1.27%
Which are made up of:	
Total management and administration charges (including GST)	1.27%
Including:	
Manager's basic fee	1.09%
Other management and administration charges	0.18%
Total performance-based fees	0.00%

Other management and administration charges" includes an estimate of the administration charges incurred in the underlying fund in which the Fund invests. The estimate incorporates information provided by the underlying fund manager as well as information sourced from the underlying fund's disclosure documents.

See the product disclosure statement for more information about the basis on which performance fees are charged.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Antipodes Investment Funds on the offer register at <https://disclose-register.companiesoffice.govt.nz> for more information about those fees.

## Example of how this applies to an investor

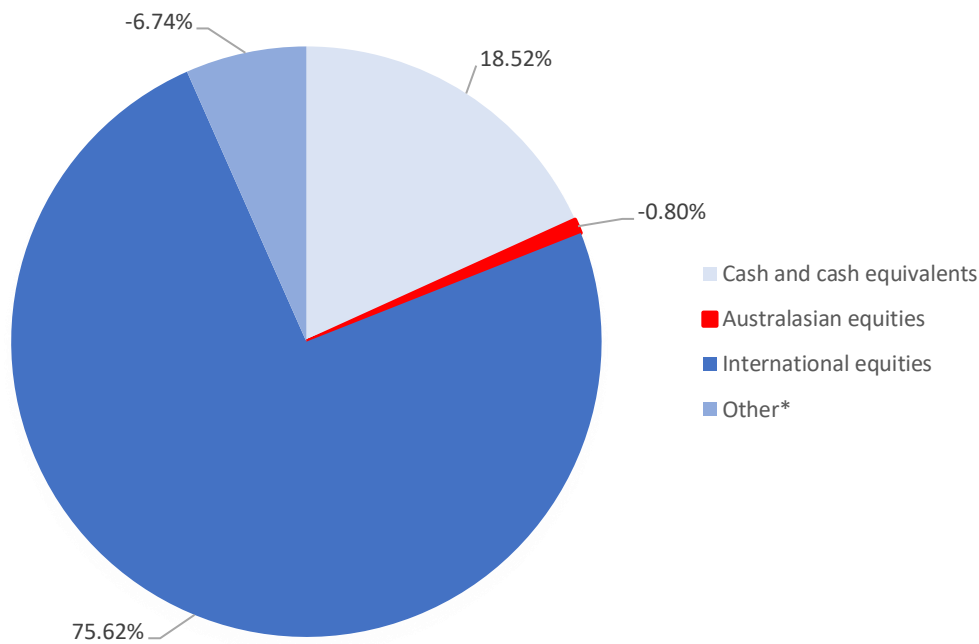

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony incurred a loss after fund charges were deducted of \$181 (that is -1.81% of his initial \$10,000). This gives Anthony a total loss after tax of \$287 for the year.

## Further information

You can also obtain this information, the PDS for the Antipodes Investment Funds, and some additional information from the offer register at <https://disclose-register.companiesoffice.govt.nz>.

---

## Notes

<sup>1</sup> A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility. Market index returns have been used until July 2018 and fund returns thereafter.

<sup>2</sup> Underlying fund fees and expenses are reflected in the unit prices of the underlying funds that are used when calculating the unit price of the Fund. Estimates of these fees and expenses have been made based on information provided by underlying fund managers of each underlying fund's actual costs as a percentage of the average net asset value that was charged, for each underlying fund's previous financial year.

<sup>3</sup> As well as obtaining equity exposure through long direct equity holdings, the fund also takes short equity positions. As at the date of this fund update, the Underlying Fund holds long positions equating to 94.67% of that fund gross asset value and short positions equating to -28.62%, resulting in a net exposure of 66.05%. The graph does not disclose short positions as a separate item, but does reflect the net asset exposures (i.e., long exposures less short exposures) of the Underlying Funds as a proportion of the Net Asset Value of the Antipodes Global Fund (PIE). Equity exposures include index and single security derivative exposures. Weightings are based off notional values, so the graph may not add up to 100%.

<sup>4</sup> Notional values have been used to derive the top 10 investments.
