• This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The Fund appears as a '6' on the scale. The Fund invests in fixed income investments whose values do not fluctuate widely.

• The Fund will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default.

• A Fund's investments may be acquired in a wide range of currencies and changes in exchange rates between currencies may cause the value of an investment in a Fund to fluctuate.

• If interest rates go up, the value of the capital may fall, and vice versa.

• A third party which issues bonds may fail to meet its interest repayments, or repay its debt, leading to losses for the Fund. The risk is greater for investments that have a lower credit-rating.

• Derivatives can carry a high degree of risk - a relatively small movement in the

price of the underlying security may result in a disproportionately large movement, unfavourable or favourable, in the price of the derivative. Please do not invest if you do not have the level of knowledge required in order to assess and evaluate the risks associated with the use of derivatives by the Fund or the impact of derivatives on your investment.

• Exchange Rate Risk - Fluctuations in exchange rates may cause the value of your investment to rise or fall.

• The Fund invests in a relatively limited number of companies, sectors and/or countries and currencies. This focused strategy can produce high gains but can also lead to significant loss.

• Counterparty Risk - The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.

• The Fund will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default.

• Liquidity Risk - Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

• The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.
