

## Fund Profile

The Acumen AcuityTen FR QI Hedge Fund is a multi-strategy focused portfolio but primarily seeks returns from fixed income and currency markets. Investments of the portfolio will be subject to the provisions and limitations of Board Notice (BN) 52 of 2015.

## Portfolio Objective

The long-term investment objective of the portfolio is to provide investors with a consistent absolute return by investing across a number of different asset classes.

## Investment Strategy

The portfolio is an unconstrained, non-correlated, non-benchmarked absolute return mandated fund seeking positive returns over 20% irrespective of market volatility or direction. The fund focuses primarily, but not exclusively, on liquid South African rates and major global currency markets. Armed with a strong fundamental theme-based view, and alongside seasoned trading experience and a deep understanding of domestic capital markets, the fund implements strategies with a short to medium term pay out profile using an array of instruments ranging from linear cash securities to non-linear derivatives. Acuity 10 uses sophisticated, highly granular in-house proprietary systems to construct, risk-manage and optimize event-driven, directional and relative value strategies. Core to the fund's investment philosophy is to manage returns on an annual and not monthly basis. Therefore, as the year progresses, strategy gearing and scaling become a function of both opportunity and year to date performance.

## Risk Profile

Low

Low - Medium

Medium

Medium - High

High

The risk-reward profile is based on historical data and may not be a reliable indication of the future risk profile of the portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including: market risk, liquidity risk and risks associated with the short selling of securities. Equity investments are volatile by nature and subject to potential capital loss. The Manager and the Portfolio Manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial advisor to determine the appropriateness of the product for your portfolio.

## Performance

Performance Comparison	Fund	ALBI

**Please note:** All fund returns quoted net of fees.

The above benchmark is for comparison purposes with the fund's performance. The fund does not follow the benchmark.

## Portfolio Valuation & Transaction Cut-Off

Portfolios are valued monthly. The cut off time for processing investment subscription is 10:00am on the last business day of the month prior to enable processing for investment on the first business day of the next month. Redemptions are subject to one calendar months' notice.

## Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Investment performance is for illustrative purposes only. The investment performance is calculated by taking the actual initial fees and all ongoing into account for the amount shown and income is reinvested on the reinvestment date. The performance figure given show the yield on a Net Asset value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed, and Investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment and dividends withholding tax. The annualised total return is the average return earned by an investment each year over a given period. Actual annual figures are available from the manager on request.

The highest and Lowest 1 year returns represent the highest and lowest returns achieved during any single calendar year since the original launch date of the portfolio.

**Market Commentary**

The year concluded on a strong note for South African assets, with broad-based gains across the currency, government bonds, equities, and commodities.

The GOVI Index delivered a return of 23.91%, while the rand appreciated by 11.95% against the US dollar. South African equities also performed exceptionally well, with the TOP40 Index rising 43%, alongside a standout performance from gold, which gained 65% over the period. Taken together, this represents one of the most powerful and synchronised all-round performances across South African asset classes in recent history.

AcuityTen was well positioned to benefit from the continued rally in December, delivering a gross return of 3.3% for the month and concluding the year with a 48% gross return.

**Please Note:** The above commentary is based on reasonable assumptions and is not guaranteed to occur.

## Fund Risk:

**Leverage Risk:** The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.

**Derivative Risk:** Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.

**Counterparty Credit Risk:** Counterparty risk <<https://www.investopedia.com/terms/c/counterpartyrisk.asp>> is a type of credit risk <<https://www.investopedia.com/terms/c/creditrisk.asp>> and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.

**Volatility Risk:** Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.

**Concentration and Maturity Segment Risk:** A large proportion of total assets invested in specific assets and/or maturity segments on the yield curve. Concentrated positions in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.

**Correlation Risk:** A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.

**Interest Rate Risk:** The values of bonds and other debt securities are inversely proportional to the change in interest rates. Interest rate risk is generally greater for investments with longer maturities as well as when the market does not expect a change in the interest rates.

**Credit Default Risk:** The risk that the government entity or company that issued the bond will run into financial difficulties and won't be able to pay the interest or repay the principal at maturity. Credit risk applies to debt investments such as bonds. The higher credit rating the less likely the possibility of the issuing company defaulting.

## Glossary:

**Net Asset Value (NAV):** means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.

**Annualised Return:** is the weighted average compound growth rate over the performance period measured.

**Highest & Lowest Return:** The highest and lowest rolling twelve-month performance of the portfolio since inception.

**Total Expense Ratio (TER):** reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

**Transaction Costs (TC):** is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.

**Total Investment Charge (TIC):** should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.

**Total Investment Charges (TIC%):** = TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

**Derivative:** A contract that derives its value (positive or negative) from the performance of another asset.

**Standard Deviation:** The deviation of the return of the portfolio relative to its average.

**Downside Deviation:** Disparity of returns below the average return of the portfolio.

**Drawdown:** The greatest peak to trough loss until a new peak is reached.

**Sharpe Ratio:** The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.

**Sortino Ratio:** The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.

## Mandatory Disclosure

Collective Investment Schemes are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, minimum fees, and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from FundRock Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published monthly on our website. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, is the appointed trustee. Acumen Capital (Pty) Ltd, FSP No. 14927, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
