

Fund Update

For the quarter ended 30 June 2022

- **Lighthouse Investment Funds**
- **Lighthouse Global Equity Fund**

This fund update was first made publicly available on: 28 July 2022

What is the purpose of this update?

This document tells you how the Lighthouse Global Equity Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Implemented Investment Solutions Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: The investment objective of the Fund is to deliver long-run pre-tax returns (after fees and expenses) that are at least 2% pa above the return of the MSCI All Country World Net Index and to minimise the Fund's "losing years" – that is financial years where investors receive a negative return, or loss, rather than a positive return.

Strategy: The Fund invests in very large capitalisation stocks and ETFs listed on the NYSE and Nasdaq stock markets, and in call options listed on the CBOE exchange. The Fund may use leverage of up to 20% of NAV. The Fund's foreign currency exposures are not hedged back to New Zealand dollars.

Total value of the fund	\$NZ 5,895,578
The date the fund started	1 March 2021

What are the risks of investing?

Risk indicator for the Lighthouse Global Equity Fund¹.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

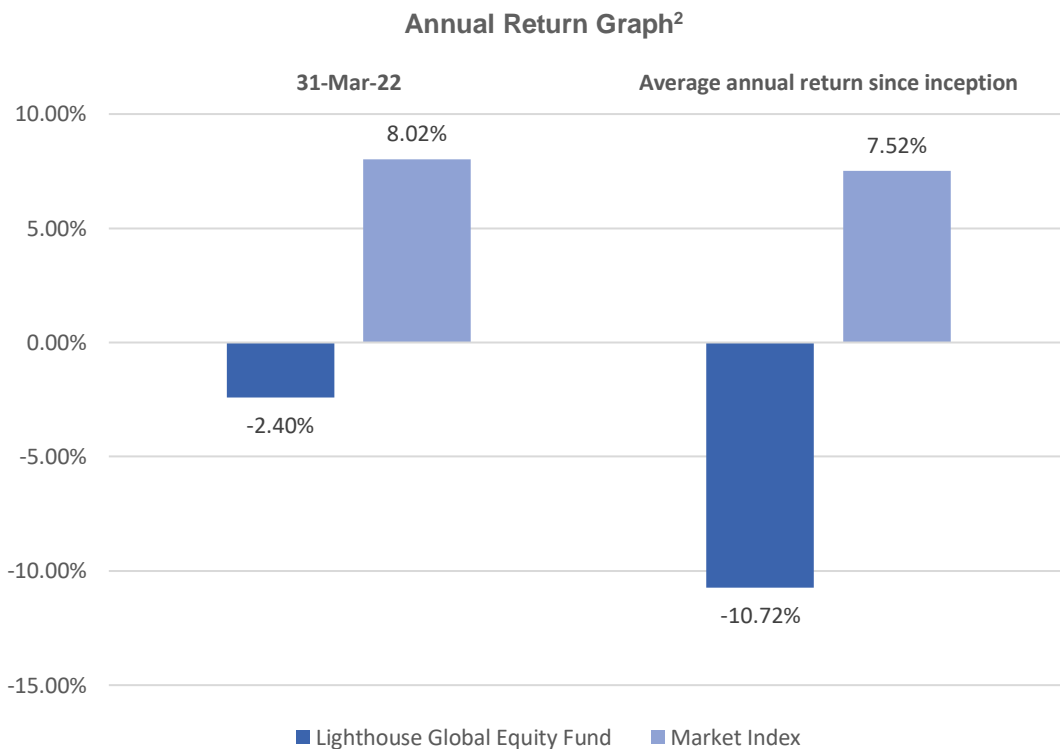

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for 5 years to 30 June 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	-18.77%
Annual return (after deductions for charges but before tax)	-20.67%
Market index annual return (reflects no deduction for charges and tax)	-5.32%

The market index return is the MSCI All Country World Net Index, measured in NZ dollars. This has been the market index since the inception of the fund. Additional information about the market index is available on the offer register at www.disclose-register.companiesoffice.govt.nz.

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2022.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Lighthouse Global Equity Fund are charged fund charges. In the year to 31 March 2022 these were:

	% of net asset value (including GST)
Total fund charges	1.04%
Which are made up of:	
Total manager and administration charges	1.04%
Including:	
Manager's basic fee (including GST)	1.04%
Other management and administration charges	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Lighthouse Investment Funds on the offer register at www.disclose-register.companiesoffice.govt.nz for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony incurred a loss after fund charges were deducted of \$2,067 (that is -20.67% of his initial \$10,000). This gives Anthony a total loss after tax of \$1,877 for the year.

What does the fund invest in?

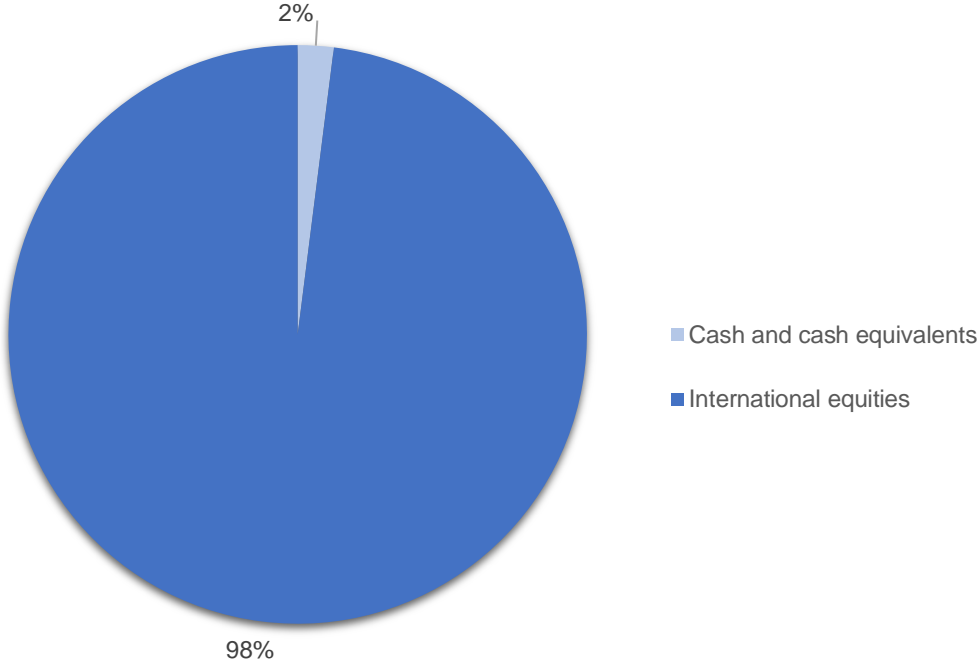

This shows the types of assets that the fund invests in.

Actual investment mix³

The Fund's foreign currency exposures are not hedged back to New Zealand dollars.

Target investment mix

Top 10 investments

	Name	% of Fund net assets	Type	Country	Credit rating (if applicable)

Further information

You can also obtain this information, the PDS for the Lighthouse Global Equity Fund, and some additional information from the offer register at www.disclose-register.companiesoffice.govt.nz.

Notes

¹ A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until 31 March 2021 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.

² The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.

³ The Fund can use moderate leverage, i.e. debt. Any leverage is limited to a maximum of 20% of Fund net asset value. Hence, the Fund may be 100%-120% invested in International equities, while Cash and cash equivalents may be between 0% and -20%.
