While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

Notes

1. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. As the fund has not completed a full scheme year as at 31 March 2025, historical fee information is not available.
3. As the fund has not existed for a full year, figures in this example are based on returns from the date of the inception date.
