Risk indicator for the Bentham Global Income PIE Fund.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Notes

- ¹ The Fund invests in an underlying fund which has a 5-year return history. A combination of underlying fund and actual fund returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The underlying fund's returns have been used until 30 April 2023 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
- ² As the fund only started accepting contributions on 11 April 2023, historical fee information is not available.
- ³ As the fund has not existed for a full year, figures in this example are based on returns from the date of the first fund contribution (11 April 2023).
