

Investment Objective

The objective of the fund is to create consistent long-term wealth for investors irrespective of market direction.

Fund Profile

The portfolio typically spans all South African equity sectors, with the majority of exposure being in the top 100 listed equities on the JSE, by market capitalisation. Our portfolio construction approach assigns exposures into different risk buckets; namely low risk intra-sector pairs, cross-sector pairs, themes and absolute value. Intra-sector pairs typically dominate the portfolio and position sizes rarely exceed 10%. Leverage rarely exceeds 2.5 times and net exposure, once beta adjusted is generally close to zero. The fund aims to return Cash plus 5 - 7% annually, on a rolling 3 year basis.

Cumulative Performance Since Inception

The investment performance is for illustrative purposes only; the investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown; assuming income is reinvested on the reinvestment date.

The above benchmark(s) are for comparison purposes with the fund's performance. The fund does not follow the benchmark(s).

Return Analysis (Annualised)

	Fund	JIBAR 3M
1 Year	-4.00%	7.33%

*The inception date for the portfolio is 1 November 2003. The historical performance figures until the end of 31 October 2016 reflect performance achieved prior to CISCA regulation. The portfolio has been transitioned under CISCA regulations on 1 November 2016 and has since been managed as a regulated product. The annualized total return is the average return earned by an investment each year over a given time period, since date of the launch of the fund. Actual annual figures are available from the manager on request. The highest and lowest 1 year returns represent the highest and lowest actual returns achieved during a 12 month rolling period year since the original launch date of the portfolio. The performance figures given show the yield on a Net Asset value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a Net Asset Value basis. The performance figures are reported net of fees with income reinvested

Risk Profile

Risk Level	Low	Low-Medium	Medium	Medium-High	High
------------	-----	------------	--------	-------------	------

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. FundRock Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

Market Commentary

Global risk assets moved through February with policy uncertainty again dominating the tape. US trade-policy volatility spiked after a US Supreme Court ruling challenged the legality of Trump's tariffs, only to be followed quickly by a fresh global tariff announcement-initially framed at 10% and later referenced as 15%. Geopolitics remained tightly intertwined with that policy mix. US-Iran diplomacy stayed central in multiple reads, with references to nuclear talks continuing or resuming (Geneva was cited), and the associated push-pull between a lower oil risk premium and periodic re-pricing of geopolitical tail risk.

The AI narrative continued to act as both an anchor and a source of dispersion. On one hand, the "infrastructure boom" framing remained intact, with hyperscale spending plans supportive of semiconductors and parts of the industrial value chain. On the other hand, AI disruption fears broadened beyond software into areas like brokerage/advice, payments and real estate services, driving sharp single-stock moves and rapid sector rotations. In commodities, oil traded to the rhythm of diplomacy and supply signalling-Iran headline risk on the one side, and Saudi pricing references on the other-reinforcing that macro outcomes are currently being set as much by politics as by data.

In South Africa, the policy backdrop was comparatively constructive, with the country delivering a very balanced budget and reinforcing a steadier fiscal tone. February was also more micro-heavy, with a busy results season providing clearer company-level signals than the macro did. Tiger Brands (-6%) four-month trading update was soft, with sales growth around -1% (alongside 2% volume and -1% price/mix in the notes), underscoring the ongoing pressure on pricing power in a constrained consumer environment. Within the retailers, the month delivered both relief and disappointment. Better-than-feared results, indicating sales delivery without the feared gross margin pressure, saw Truworths (+1%) end the month largely unchanged. By contrast, Spar (-21%) saw its CEO depart and then delivered a very poor retail update, re-highlighting execution risk even where valuations look optically cheap. MTN (+15%) announced the acquisition of the remaining stake in IHS not already owned, in a \$2.2bn all-cash deal for the remaining 75.3%, bringing capital allocation and strategic clarity back into focus. Within financials, Nedbank (+19%) trading statement suggested a stronger finish to the year, providing a more constructive counterpoint to lingering concerns around domestic growth.

Cash generation across parts of the resources complex continued to surface via record dividends from the gold and PGM miners. Sibanye (-5%) results however, showed that they did not participate in their commodity basket rally due to poor execution and reliance on costly financial instruments. Sasol (+27%) operational performance was good, and capex guidance was downgraded, with the backdrop further helped by a rebound in oil. Mondi (+1%) was against a tough operating backdrop, with paper peers again struggling to secure the price increases required to offset cost and demand pressures.

Looking ahead, markets remain sensitive to the interaction between tariff and geopolitical headline risk, the legal endgame on US trade policy, and the extent to which "market-friendly" policy signalling translates into tangible outcomes. Locally, a supportive external mix and improving foreign engagement after South Africa's removal from the FATF grey list and recent S&P ratings upgrade, counterweights restrictive real rates and a still-fragile consumer. This environment argues for continued selectivity. Dispersion is elevated across sectors. We continue to emphasise balance, liquidity and agility to exploit relative value dislocations as the macro narrative evolves.

Please Note: The above commentary is based on reasonable assumptions and is not guaranteed to occur.

Glossary

Net Asset Value (NAV) :	Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
Annualised Return :	Is the weighted average compound growth rate over the performance period measured.
Highest & Lowest Return :	The highest and lowest rolling twelve-month performance of the portfolio since inception.
Total Expense Ratio (TER) :	Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
Transaction Costs (TC) :	Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.
Total Investment Charges (TIC) :	Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
Total Investment Charges (TIC%) :	= TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
Standard Deviation :	The deviation of the return of the portfolio relative to its average.
Drawdown :	The greatest peak to trough loss until a new peak is reached.
Sharpe Ratio :	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
Sortino Ratio :	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
Correlation :	A number between -1 and 1 indicating the similarity of the dispersion of returns between the portfolio and another asset or index with 1 being highly correlated, -1 highly negatively correlated and 0 uncorrelated.
Value at Risk (VaR) :	Value at risk is the minimum loss percentage that can be expected over a specified time period at a predetermined confidence level
Leverage/Gearing :	The use of securities, including derivative instruments, short positions or borrowed capital to increase the exposure beyond the capital employed to an investment.

Fund Risk

Leverage Risk :	The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.
Derivative Risk :	Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
Counterparty Credit Risk :	Counterparty risk is a type of credit risk and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.
Volatility Risk :	Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.
Concentration and Sector Risk :	A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
Correlation Risk :	A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.
Equity Risk :	Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

Portfolio Valuation & Transaction Cut - Off

Portfolios are valued monthly. The cut off time for processing investment subscriptions is 10:00am on the last business day of the month prior to enable processing for investment on the first business day of the next month. Redemptions are subject to one calendar months notice.

Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Mandatory Disclosures

Investment Manager: Fairtree Asset Management (Pty) Ltd, Registration Number: 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (No.37 of 2002). Please be advised that there may be representatives acting under supervision. Physical Address: Willowbridge Place, Cnr. Carl Cronje and Old Oak Road, Bellville, 7530. Postal Address: PO Box 4124, Tygervalley, 7536. Telephone Number: +27 86 176 0760. Website: www.fairtree.com. Management Company: FundRock Management Company (RF) (Pty) Ltd (the "Manager"), Registration Number: 2013/096377/07, is authorised in terms of the Collective Investment Schemes Control Act (CISCA) to administer Collective Investment Schemes (CIS). Physical Address: Catnia Building, Bella Rosa Office Park, Bella Rosa Street, Bellville, 7530, South Africa. Telephone Number:+27 (0)21 879 9937/(0)21 879 9939. Website: www.fundrock.com, Trustee: FirstRand Bank Limited (acting through its RMB Custody and Trustee Services Division). Physical Address: 3 Merchant Place, Ground Floor, Corner Fredman and Gwen Streets, Sandton, 2146 Telephone: +27 87 736 1732. Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, minimum fees and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from FundRock Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published monthly on our website. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. Performance fees will be calculated and accrued on a daily basis based upon the daily outperformance, in excess of the benchmark, multiplied by the share rate and paid over to the manager monthly. The performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, is the appointed trustee. Fairtree Asset Management (Pty) Ltd, FSP No. 25917, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
