## What is the purpose of this update?

This document tells you how the First Sentier Investments Global Listed Infrastructure Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. ## Description of this fund

**Objective:** to deliver capital growth and inflation-protected income by investing in a globally diversified portfolio of infrastructure securities. The Fund aims to outperform the FTSE Global Core Infrastructure 50-50 Net Total Return Index (NZD hedged), after fees and expenses, but before investor taxes, over a rolling three year period.

**Strategy:** The Fund invests in the shares of companies from around the world that own or operate infrastructure assets. The infrastructure sector includes operating assets from the transport, utilities, energy and communications sectors. The assets held by these companies typically offer high barriers to entry, pricing power, and structural growth. The strategy is based on active, bottom-up security selection which seeks to identify mispricing. The Fund seeks to minimise risk by on-the-ground research, a focus on quality and sensible portfolio construction. Currency exposure will be hedged back into New Zealand dollars using forward currency contract derivatives.

Total value of the fund	\$NZ 495,148,663
The date the fund started	17 December 2013

## What are the risks of investing?

Risk indicator for the First Sentier Investments Global Listed Infrastructure Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

## Notes

<sup>1</sup> The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.

<sup>2</sup> The fees disclosed are consistent with the most recent PDS as the actual fees charged for the year ended 31<sup>st</sup> March 2021 were reflective of when the fund was restricted to wholesale investors

<sup>3</sup> As the GST component of fund charges (such as Supervisor and Manager fees) varies, we have estimated GST using the estimated mix of underlying fund charges.
