Objective & Investment Policy

The investment policy permits the implementation of the portfolio's strategy through both direct instruments and indirect exposure via collective investment schemes, including offshore funds where the regulatory environment is considered by the Manager and Trustee to provide an equivalent level of investor protection. The Manager retains discretion to manage portfolio capacity and may close and subsequently reopen the portfolio to new investors where necessary to preserve the integrity of the investment process. All investments are undertaken in accordance with applicable regulatory requirements, including the limits and conditions prescribed for South African Retail Hedge Funds.

Investment Profile

The Storm Capital Worldwide Flexible Value FR Retail Hedge Fund seeks to deliver superior medium- to long-term capital growth through a flexible, value-driven investment strategy that allocates capital opportunistically across a diversified range of global and South African asset classes. The portfolio may invest in listed equities, fixed income securities, money market instruments, property securities, REITs, exchange traded funds (ETFs), collective investment schemes, commodities, currencies and listed or over-the-counter derivative instruments. It may establish both long and short investment positions and utilise leverage, within the limits prescribed for South African Retail Hedge Funds, to enhance investment opportunities, manage portfolio risk and generate risk-adjusted returns, while maintaining a strong focus on capital preservation.

Risk Profile**

Low	Low-Medium	Moderate	**Moderate- High**	High

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk and settlement risk. FundRock Collective Investments (RF) (Pty) Ltd, ("the Manager") and the Investment Manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial advisor.

Please note: All fund returns are quoted net of fees.

Asset Allocation

Sector Allocation

Exposure Statistics

Gross exposure	8.44%
Net exposure	8.63%

Portfolio Valuation and Transaction cut-off

The portfolio is valued daily and the transaction cut-off time is 14:00pm on the day. Investor instructions received after 14:00pm shall be processed the following business day.

Total Expense Ratio and Transaction Costs

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including the market returns, the type of financial product, the investment decisions of the investment manager and the TER

Storm Capital Worldwide Flexible Value FR Retail Hedge Fund

Minimum Disclosure Document - Class 1

Fund Risk

Leverage Risk: The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.
Derivative Risk: Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
Counterparty Credit Risk: Counterparty risk is a type of credit risk and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.
Volatility Risk: Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR): Which is a statistical technique used to measure and quantify the level of volatility.
Concentration and Sector Risk: A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
Correlation Risk: A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.
Equity Risk: Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

Glossary

Net Asset Value (NAV): means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
Annualised Return: is the weighted average compound growth rate over the performance period measured.
Highest & Lowest Return: The highest and lowest rolling twelve-month performance of the portfolio since inception.
Total Expense Ratio (TER): reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
Transaction Costs (TC): is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. Total Investment Charge (TIC): should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
Total Investment Charges (TIC%): = TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
Sharpe Ratio: The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
Sortino Ratio: The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
Standard Deviation/Volatility: The deviation of the return of the portfolio relative to its average.
Statistical Arbitrage: A type of long short trading strategy.

Hedge Fund Risk Disclosure

Hedge fund strategies may include leverage, short-selling and short term investments. In addition, hedge fund portfolios often invest in unlisted instruments, low-grade debt, foreign currency and other exotic instruments. All of these expose investors to additional risk. However, not all hedge fund managers employ any or all of these strategies and it is recommended that investors consult their advisers in order to determine which strategies are being employed by the manager and which consequent risks arise.

Mandatory Disclosures

Collective Investment Schemes are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, minimum fees and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from FundRock Collective Investments (RF) (Pty) Ltd ("the Manager") .The performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the fund under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Performance fee is calculated as a percentage of the return above benchmark over each measurement period. Commission and incentives may be paid, and if so, are included in the overall costs. The portfolio may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Prices are published daily on our website. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Performance is further affected by uncertainties such as changes in government policy, taxation and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority ("FSCA") under CISCA. The Manager retains full legal responsibility for the portfolio. Storm Capital Management (Pty) Ltd , FSP No. 32647, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services FirstRand Bank Limited is the appointed trustee.
