What are the risks of investing¹?

Risk indicator for the Russell Investments Global Listed Infrastructure Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	Not Applicable
Annual return (after deductions for charges but before tax)	Not Applicable

NOTES

¹ A combination of actual fund returns, and Market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until March 2022 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.

² As the fund only started accepting contributions on 17 March 2022, historical fee information is not available.

³ As the fund has not existed for a full year, figures in this example are based on returns from the date of the first fund contribution (17 March 2022).
