Oyster Catcher Long Short FR Retail Hedge Fund

Minimum Disclosure Document - Class A

September 2026

Investment Objectives

The OysterCatcher Long-Short FR Retail Hedge Fund is positioned to earn positive returns as an absolute return product for investors with a medium to longer term investment horizon.

Investment Policy

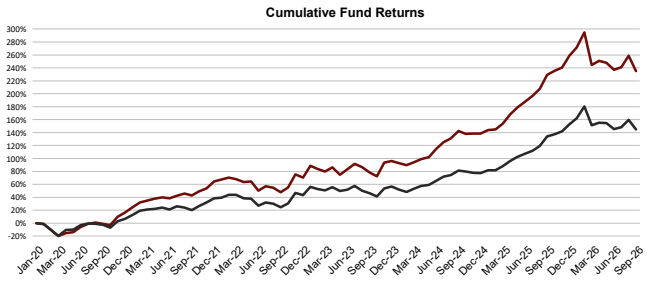

The OysterCatcher Long-Short FR Retail Hedge Fund aims to provide long term wealth for investors by seeking both long and short investment opportunities through a long-short equity investment strategy. The portfolio is a directionally biased long / short equity South African portfolio which will not hesitate to capture equity market beta as conditions dictate. The portfolio is hedged via short equity positions with negative fundamental stock views. In order to achieve its objective, the portfolio may invest in assets in liquid form, equity securities, notes, preference shares, convertible equities, non-equity securities, quasi-equity securities, money-market instruments, fixed interest securities, property securities, REITs, currencies, debentures, options, warrants, debt instruments, commodities, ETFs, bonds and other interest-bearing instruments and securities. The portfolio may invest in participatory interests or any other form of participation in portfolios of collective investment schemes, or other similar collective investment schemes, as the Act may allow from time to time, and which are consistent with the portfolio's investment policy. Where the aforementioned schemes are operated in territories other than South Africa, participatory interests or any other form of participation in portfolios of these schemes will be included in the portfolio only where the regulatory environment is, to the satisfaction of the manager and the trustee, of a sufficient standard to provide investor protection at least equivalent to that in South Africa. The portfolio may from time to time invest in listed and unlisted financial instruments, including but not limited to: repurchase agreements, over the counter securities, forex, spot trades, swaps, forward rate agreements (FRAs), contract for difference (CFDs) and futures, in accordance with the provisions of the Act, and the Regulations thereto, as amended from time to time, in order to achieve the portfolio's investment objective. The strategy may include leveraging both long and short positions. The portfolio will utilize the following leverage measure: Value-at-Risk approach (VAR).• Probability level: • Period: 1 month. Supplemental Deed is carried out. For the purpose of this portfolio, the manager shall reserve the right to close the portfolio to new investors on a date determined by the manager. This will be done in order to be able to manage the portfolio in accordance with its mandate. The manager may, once a portfolio has been closed, open that portfolio again to new investors on a date determined by the manager.

Risk Profile

Low	Low - Medium	Moderate	Moderate - High	**High**

The risk-reward profile is based on historical data and may not be a reliable indication of the future risk profile of the portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. Equity investments are volatile by nature and subject to potential capital loss. The Manager and the Portfolio Manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial advisor to determine the appropriateness of the product for your portfolio.

Fund Risk

Volatility Risk: Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.

Concentration and Sector Risk: A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.

Equity Risk: Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

Glossary

Net Asset Value (NAV): Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.

Annualised Return: Is the weighted average compound growth rate over the performance period measured.

Highest & Lowest Return: The highest and lowest rolling twelve-month performance of the portfolio since inception.

Total Expense Ratio (TER): Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Transaction Costs (TC): Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.

Total Investment Charge (TIC): Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.

Total Investment Charges (TIC%): = TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

Portfolio Valuation & Transaction Cut-Off Time

Portfolios are valued daily. The cut off time for processing investment subscriptions is 14:00pm on a business day. Valuation takes place daily and prices can be viewed on our website (www.fundrock.co.za) or in the daily newspaper.

Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Mandatory Disclosure

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, minimum fees, and maximum commissions is available on request from the manager, as well as a detailed description of how performance fees are calculated and applied.The performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the fund may place the fund under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs.Actual annual figures are available to the investor on request.

The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. The manager retains full legal responsibility for the third-party-named portfolio.Prices are published daily on our website. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager.

Performance fees will be calculated and accrued on a daily basis based upon the daily outperformance, in excess of the benchmark, multiplied by the share rate and paid over to the manager monthly.

Hedge fund strategies may include leverage, short-selling and short-term investments. In addition, hedge fund portfolios often invest in unlisted instruments, low-grade debt, foreign currency, and other exotic instruments. All these expose investors to additional risk. However, not all hedge fund managers employ any or all these strategies and it is recommended that investors consult their advisers to determine which strategies are being employed by the manager and which consequent risks arise.

A manager must ensure that publishing of performance of a portfolio is based on performance calculations which are done on a NAV to NAV basis over all reporting periods; provided that where a NAV is not available, the value used to calculate the performance and which was agreed with the trustee must be clearly stated and a description of how the figures where calculated must be provided. Reinvestment of income is calculated on the actual amount distributed per participatory interest, using the e-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date.
