The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FP Russell Investments Multi Asset Growth Fund II, a sub-fund of FP Russell Investments ICVC

Class C Accumulation Shares (GBP) (ISIN GB00BYXJKQ77)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The Fund aims to generate a return over the long term (5 years). Capital invested in the Fund is at risk and there is no guarantee that the investment objective will be met over the 5 year investment period or in respect of any other period.

Policy:

The Fund will seek to achieve its objective by investing at least 80% of its assets in:

- Global equity securities (shares and other transferable securities equivalent to shares) which are traded on a public exchange
- Collective investment schemes (third party and those managed by the investment manager and or its affiliates) which invest at least 80% of their assets in global equity securities and fixed income securities.
- Collective investment schemes and other investments (for example transferable securities) that provide exposure to alternative asset classes such as global property, infrastructure, commodities (indirectly, for example through exchange traded commodity index futures) and inflation linked securities.
- Transferable securities, that gain exposure to global fixed income securities, global equity securities, property securities, infrastructure securities and alternative asset classes.
- This will be achieved by investing at least 50% in a combination of Russell Investments collective investment schemes as well as external collective investment schemes.
- The Fund's exposure to growth assets (such as equity securities, equity collective investment schemes, listed real estate, listed infrastructure and commodities) will be limited at 60% of the total fund's assets.
- The Fund may use currency hedging techniques to reduce exposure to currencies other than Sterling.
- The Fund may also invest, in other transferable securities (such as shares, debentures government and public securities which carry the right to acquire any security within), money market instruments (a type of security dealt with on the money market where cash can be deposited for short periods such as treasury bills,

certificates of deposit and commercial papers and excluding instruments of payment), cash, near cash and deposits.

- The Fund may also use derivatives (investments whose value is linked to another investment, or the performance of a stock exchange or to some other variable factor, such as interest rates) for efficient portfolio management and for investment purposes. Efficient portfolio is where the fund is managed in a way to reduce risk or cost and/or generate extra income or growth.
- During certain market conditions where, in the opinion of the Investment Manager it is prudent to do so, the Fund may hold up to 50% of its assets in cash.

Benchmark:

No Benchmark: Because the Fund has a flexible allocation between equity and fixed income investments, there is no index or sector that would be an appropriate comparator. The Fund is risk-rated by a risk-rating service provided by Synaptic Software Limited ("Synaptic Risk Ratings"). Synaptic Risk Ratings associates a fund's returns with a particular level of risk and enables comparison between funds which are managed on a similar basis. Performance can be assessed against the range of asset classes in which the Fund invests, in proportion to its holdings in these asset classes. The investment manager has discretion over the portfolio composition. Portfolio composition is not constrained by a benchmark.

Other information:

- Buying/selling shares: on each working day at 07:00 if you tell us before 17:00 on the working day before, except on UK public holidays.
- For accumulation shares, income will be rolled up into the value of shares.
- For income shares, income from investments is paid out once a year.
- Derivatives: used to reduce the risks otherwise associated with making investments in currencies other than the Fund's accounting currency (Sterling).
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

• This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The Fund appears as a '4' on the scale. This is because it invests in a mixture of investments. The value of some of these investments may vary more widely than others.

• A Fund's investments may be acquired in a wide range of currencies and changes in exchange rates between currencies may cause the value of an investment in a Fund to fluctuate.

• If interest rates go up, the value of the capital may fall, and vice versa.

• A third party which issues bonds may fail to meet its interest repayments, or repay its debt, leading to losses for the Fund. The risk is greater for investments that have a lower credit-rating.

• Derivatives can carry a high degree of risk - a relatively small movement in the price of the underlying security may result in a disproportionately large movement,

unfavourable or favourable, in the price of the derivative. Please do not invest if you do not have the level of knowledge required in order to assess and evaluate the risks associated with the use of derivatives by the Fund or the impact of derivatives on your investment.

• Exchange Rate Risk - Fluctuations in exchange rates may cause the value of your investment to rise or fall.

• The Fund invests in a relatively limited number of companies, sectors and/or countries and currencies. This focused strategy can produce high gains but can also lead to significant loss.

• Counterparty Risk - The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.

• The Fund will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default.

• Liquidity Risk - Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

• The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.

For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available from FundRock Partners Limited – Russell Investments, PO Box 10204, Chelmsford, CM99 2AQ or, during normal business hours on 01268 44 8211.
