Notes

- ¹ A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until 31 October 2023 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
- ² As the fund only started accepting contributions on 3 October 2023, historical fee information is not available.
- ³ As the fund has not existed for a full year, figures in this example are based on returns from the date of the first fund contribution (3 October 2023).
