

Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MI Tatton Blended Balanced Fund - A Accumulation Shares; ISIN: GB00BFFXRF21

MI Tatton Blended Balanced Fund a sub-fund of MI Tatton Oak ICVC. The Fund is a non-UCITS retail scheme Open Ended Investment Company.

Apex Fundrock Ltd is the Authorised Corporate Director of the Fund ("MI" and "MI Funds" are trading names of the ACD).

Objectives and Investment Policy

The objective of the Fund is to maximise potential total return (i.e. capital and income growth).

One measure of risk is the proportion invested in the riskiest assets, such as equities. For this Fund, over the long-term (7 years), it is expected that the proportion of the Fund exposed to equities will be approximately 60%. In the shorter term, this weighting may be adjusted tactically as economic and market conditions dictate while not deviating by more than $\pm 12.5\%$. The Investment Manager will manage the portfolio in order to achieve its investment objective by investing in collective investment schemes such as unit trusts, OEICs and other UCITS funds and closed ended schemes. The Fund may also invest in individual stocks, bonds and derivatives if considered appropriate to meet the investment objective.

The Fund will seek exposure to a diverse portfolio of assets, with a balance between passive and active strategies, with the overall portfolio having an equity allocation in line with that in the investment objective.

Other underlying assets in the portfolio (to which there will be indirect exposure) may include bonds, commodities, property, private equity, derivatives and other instruments. Some of these investments will be denominated in foreign currencies which may or may not be hedged back to Pounds Sterling.

The Fund may also invest, at the ACD's discretion, in other transferable securities, money market instruments, cash and near cash, deposits and any other permitted asset type deemed appropriate to meet the investment objective. The Fund may also use derivatives for the purposes of efficient portfolio management. The Fund is actively managed.

Other information:

You can buy and sell shares in the Fund on any business day. If you hold accumulation shares, any income from the Fund will be reinvested to grow the value of your investment.

Recommendation this Fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.

This Fund is ranked at this rating because funds of this type have experienced average rises and falls in value in the past.

The following risks are material in addition to the risks captured by the indicator above:

Counterparty risk: The Fund can conclude various transactions with contractual partners.

If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.

Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.

Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.

Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.

Derivatives Risk: use of derivatives may result in gains or losses that are greater than the original amount invested.

Exchange Traded Funds: The Fund may invest in exchange traded funds. Exchange traded funds represent a basket of assets and derivatives contracts that may be traded on an exchange and may not necessarily trade at the net asset value of their underlying holdings. As a result they may trade at a price that is above or below the value of the underlying portfolio.
