Investment Object

The AG Capital Balanced FR Fund will aim to deliver consistent real returns to investors over time, whilst minimizing portfolio volatility.

Investment Policy

The AG Capital Balanced FR Fund will aim to deliver consistent real returns to investors over time, whilst minimizing portfolio volatility. In order to achieve this objective, the portfolio will invest in a diversified range of listed and unlisted instruments, including equities, bonds, property instruments, preference shares, debentures, fixed interest securities, instruments based on the value of any precious metal, exchange traded funds and money market instruments. The portfolio is permitted to invest into listed and unlisted financial instruments as determined by regulations from time to time. Asset allocation will be managed actively, and the portfolio will seek to capture value opportunities by switching between asset classes and also focus on equity selection opportunities. The portfolio will predominately invest in South African markets, however, is permitted to include investments in offshore jurisdictions subject to the investment conditions determined by regulations from time to time. The portfolio will be subject to the Prudential Investment Guidelines for South African Retirement Funds, being Regulation 28 of the Pension Funds Act, or such other regulations published from time to time.

Performance of this fund will not be disclosed due to the fact that the fund is in existence for less than twelve months. The annualised and rolling twelve-month investment returns will be reflected from twelve months after the launch date of the fund.

Risk Profile

Low	Low-Medium	Medium	Med-High	High
-----	------------	--------	----------	------

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. FundRock Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

Please note: All fund returns quoted net of fees.

**Portfolio Valuation & Transaction Cut-Off**

The portfolio is valued daily. The transaction cut-off time is 14:00pm on a business day. Investor instructions received after 14:00pm shall be processed the following business day.

**\*Total Expense Ratio & Transaction Costs**

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

**Portfolio Asset Allocation Report & Exposure Statistics**

Asset Allocation

Exposure Statistics

Effective exposure	68.08%
--------------------	--------

**Fund Risk**

- Interest Rate Risk:** The values of bonds and other debt securities are inversely proportional to the change in interest rates. Interest rate risk is generally greater for investments with longer maturities as well as when the market does not expect a change in the interest rates.
- Derivative Risk:** A Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
- Credit Default Risk:** The risk that the government entity or company that issued the bond will run into financial difficulties and won't be able to pay the interest or repay the principal at maturity. Credit risk applies to debt investments such as bonds. The higher credit rating the less likely the possibility of the issuing company defaulting.
- Volatility Risk:** Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.
- Concentration and Sector Risk:** A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
- Equity Risk:** Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.
- Currency/Exchange Rate Risk:** Assets of a fund may be denominated in a currency other than the Base Currency of the fund and changes in the exchange rate between the Base Currency and the currency of the asset may lead to a depreciation of the value of the fund's assets as expressed in the Base Currency.

**Glossary**

Net Asset Value (NAV):	means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
Annualised Return:	is the weighted average compound growth rate over the performance period measured.
Highest & Lowest Return:	The highest and lowest rolling twelve-month performance of the portfolio since inception.
Total Expense Ratio (TER):	reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
Transaction Costs (TC):	is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.
Total Investment Charge (TIC):	should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
Total Investment Charges (TIC%):	= TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
Standard Deviation:	The deviation of the return of the portfolio relative to its average.
Downside Deviation:	Disparity of returns below the average return of the portfolio.
Drawdown:	The greatest peak to trough loss until a new peak is reached.
Sharpe Ratio:	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
Sortino Ratio:	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
Correlation:	A number between -1 and 1 indicating the similarity of the dispersion of returns between the portfolio and another asset or index with 1 being highly correlated, -1 highly negatively correlated and 0 uncorrelated.
MTD:	Month to date return.

**Mandatory Disclosures**

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, minimum fees and maximum commissions is available on request from the manager, as well as a detailed description of how performance fees are calculated and applied. The manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the fund may place the fund under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The portfolio may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.

Prices are published daily on our website. Additional information, including Key Investor Information Documents, Minimum Disclosure Document, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the manager.

Investors should note that the value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where funds are invested in off-shore assets, performance is further affected by uncertainties such as changes in government policy, taxation, currency risk, and other legal or regulatory developments.

The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The manager is registered and approved by the Financial Sector Conduct Authority under the Collective Investment Schemes Control Act 45 of 2002. AG Capital (Pty) Ltd (FSP No. 43325) is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services. The Manager retains full legal responsibility for the third-party-named portfolio. FirstRand Bank Limited Johannesburg, is the appointed trustee and can be contacted on +27 87 736 1732.
