KEY INFORMATION

FUND FEATURES

A regulated New Zealand PIE Fund that provides investment exposure to bitcoin.

The Bitcoin ETF PIE Fund is a simple, smart, and trusted way for Kiwis to get exposure to the performance of bitcoin.

The Fund invests in US and Canadian ETF's which in turn invest in bitcoin.

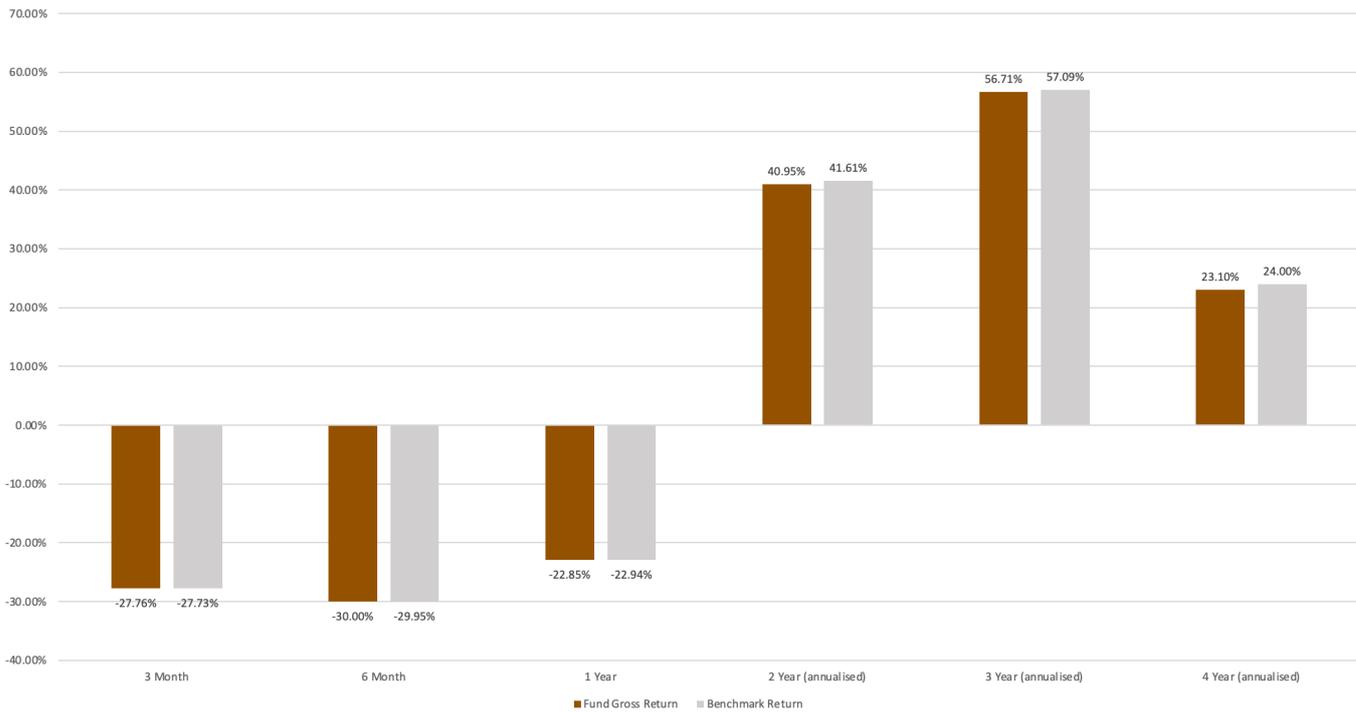

Investors get exposure to the price movements of bitcoin without the administration and tax hassles associated with investing directly via a crypto exchange.

FUND PERFORMANCE - GROSS RETURN v BENCHMARK RETURN

Bitcoin ETF PIE Fund (NZ)
as at 31 January 2026

WHY INVEST IN BITCOIN ETF PIE FUND? **PIE TAX**

Gaining exposure to bitcoin through the Bitcoin ETF PIE fund, a New Zealand based PIE fund is:

- **Simple:** you buy a managed fund (not bitcoin directly)
- **Smart:** you invest in a NZ PIE fund structure which may provide tax benefits
- **Trusted:** you invest in a NZ regulated managed fund structure - a PIE unit trust

The Bitcoin ETF PIE Fund is taxed in accordance with the Fair Dividend Rate (FDR) methodology.

This means the taxable income is set at 5% per annum, meaning that an investor on a 28% PIR rate will pay 1.4% in tax in any given year.

In contrast, where NZ tax payers invest directly in bitcoin they typically pay tax on their total return including realised capital gains.

RISK

Purchasing digital assets, or units in the Bitcoin ETF PIE Fund, involves significant risks and is highly speculative.

Please consider whether investing in digital assets or units in Bitcoin ETF PIE Fund is appropriate for you.
