## Fund Objective

To provide a total return, before costs and tax, higher than the S&P Global Listed Infrastructure Index NZD Hedged (Net TR) over the long term. The Fund targets a 20% carbon footprint reduction relative to its market index.

## Fund Update

Stock selection within the electric utilities sector detracted from performance; notably an underweight to US name Constellation Energy, which returned more than 60% for the quarter. Other positions to impact returns were our holdings in country peers Xcel Energy and Entergy Corp. Stock selection amongst multi utilities also weighed on returns, including an underweight to France's Engie SA. Performance was further impacted by stock selection within the energy space. This included overweights to US majors ONEOK and Targa Resources. In terms of strategic factor positioning, our underweight to size had a negative impact on returns, with small caps underperforming their larger counterparts over the period. In contrast, the Fund benefited from an ex-benchmark exposure to the information technology space, albeit modestly. This included our holding in Australian data centre owner NextDC, which climbed almost 30% for the quarter.

From inception to 29 January 2023 transactional prices have been calculated using security prices available at NZ market close, while the benchmark is calculated using the security prices at the close of the different global markets. This pricing methodology difference causes an embedded lagging effect. From 1 December 2021, performance is calculated using accounting methods. The Performance calculation is measured as Net income generated over the period inclusive of fees and tax. Tax is calculated applying a PIR of 28% on taxable income. Net fund performance shown is net of fees and charges. Assumes reinvestment of income.

The benchmark return shown does not include any fees and is not intended to be an indicator of the return to an investor.

Performance data is provided for informational purposes only and is not intended to imply a recommendation about a product or form the basis for making an investment decision.

Past performance is not a reliable indicator of future performance.
