

Fund Update

For the quarter ended 30 September 2026

- Raise Investment Funds
- Bitcoin ETF PIE Fund

This fund update was first made publicly available on: 29 October 2026

What is the purpose of this update?

This document tells you how the Bitcoin ETF PIE Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. FundRock NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: The fund targets a return before fees and tax that broadly tracks the S&P Bitcoin Index in New Zealand dollars.

Strategy: The fund is designed to provide investors with exposure to Bitcoin within a PIE compliant fund. This is achieved by investing in one or more listed offshore domiciled funds which invest directly in Bitcoin. This is a highly speculative investment. Bitcoin is a highly volatile asset which means this fund will not be appropriate for all investors.

Total value of the fund	\$34,417,466
The date the fund started	14 September 2021

What are the risks of investing?

Risk indicator for the Bitcoin ETF PIE Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 Sep 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	15.26%	-26.54%
Annual return (after deductions for charges but before tax)	16.55%	-25.69%
Market index annual return (reflects no deduction for charges and tax)	18.59%	-24.88%

The market index return is S&P Bitcoin Index in New Zealand dollars. This has been the market index since the inception of the fund.

Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

Annual Return Graph See note 1

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Bitcoin ETF PIE Fund are charged fund charges. In the year to 31 March 2026 these were:

	% of net asset value (inc. GST)
Total fund charges	0.96%
Which are made up of:	
Total manager and admin charges (inc. GST)	0.96%
Including:	
Manager's basic fee (inc. GST)	0.58%
Other management and administration charges	0.38%
Total performance-based fees	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Bitcoin ETF PIE Fund on the offer register at <https://disclose-register.companiesoffice.govt.nz> for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony incurred a loss after fund charges were deducted of \$2,569 (that is -25.69% of his initial \$10,000). This gives Anthony a loss after tax of \$2,654 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual Investment Mix

Foreign currency was not hedged to New Zealand dollars as at 30 September 2026

Target Investment Mix

Note: "Other" represents listed offshore domiciled funds that invest directly in Bitcoin.

Top 10 investments See note 2

Further information

You can also obtain this information, the PDS for the Raise Investment Funds, and some additional information from the offer register at <https://disclose-register.companiesoffice.govt.nz>.

Notes

1. The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.
2. The top 10 assets may add up to more than 100% of NAV as the fund also has liabilities which offsets these assets.
