

Fund Update

For the quarter ended 30 June 2025

- **Vision Invest NZ Funds**
- **Vision Income Fund**

This fund update was first made publicly available on: 20 October 2025

This is a replacement fund update. It replaces the previous fund update for the quarter ending on 30 June 2025, first made publicly available on 28 July 2025. This replacement has corrected the fund's name.

What is the purpose of this update?

This document tells you how the Vision Income Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. FundRock NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: To generate returns (after fees but before tax) that are above the median 1-year gross term deposit rate paid by the registered New Zealand banks.

Strategy: The Fund is intended to provide members of the Brethren community (Community) with an investment product that suitably satisfies the Community's ethical requirements, as an alternative to other fixed income investments in the market. The investment Manager will set a rate of return at which distributions to investors will be paid. Where the Fund's net income exceeds that set rate, the excess will be paid to Vision Invest Trust (Residual).

Total value of the fund	\$NZ 186,844,928
The date the fund started	05 June 2020

What are the risks of investing?¹

Risk indicator for the Vision Income Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over the past 5 years	Past year
Annual return (after deductions for charges and tax)	3.08%	3.87%
Annual return (after deductions for charges but before tax)	4.27%	5.41%

There is no appropriate market index and no suitable comparable peer group index for the fund against which to assess either movements in relation to the returns from the assets in which the fund invests or the performance of the fund as a whole. For further information see the document entitled "Financial Markets Conduct (Market Index) Exemption Notice 2024", available on the FMA's website (<https://www.fma.govt.nz/>).

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2025

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Vision Income Fund are charged fund charges. In the year to 31 March 2025 these were:

	% of net asset value (including GST)
Total fund charges	2.51%
Which are made up of:	
Total manager and administration charges	2.51%
Including:	
Manager's basic fee (including GST)	1.95%
Other management and administration charges	0.56%

(1) "Other management and administration charges" includes an estimate of the charges incurred in the underlying fund in which the fund invests. The estimate incorporates information provided by the underlying fund manager as well as information sourced from the underlying fund's disclosure documents.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Vision Income Fund on the offer register at www.disclose-register.companiesoffice.govt.nz for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$541 (that is 5.41% of his initial \$10,000). This gives Anthony a total return after tax of \$387 for the year.

Notes

- ¹ The fund has been in existence for less than 5 years. Returns from the Sovereign Capital Trust (a New Zealand wholesale unit trust which invests in a similar way to that proposed by the fund) have been used to calculate the risk indicator for the period 30 June 2020 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
- ² For all the loans held by the fund where "other assets" is the primary security asset type, the other assets are secured by business assets such as stock, debtors, plant & equipment, as well as personal assets of the guarantor.
- ³ The Manager has prepared this additional information in accordance with the Financial Markets Conduct (Vision Invest NZ Funds) Exemption Notice 2025. UBT Invest NZ Funds was renamed to Vision Invest NZ Funds on 31 January 2023.
