Objectives and Investment Policy

The Fund will use a broadly balanced investment strategy with the aim of achieving capital growth over the medium to longer term.

Use may also be made of stock lending, borrowing, cash holdings and derivatives. It is intended that derivatives will be used for investment purposes as well as for efficient portfolio management but the ACD does not anticipate that such use of derivatives will have any significant adverse effect on the risk profile of the Fund.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.

Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases.

This Fund is ranked this rating due to historical price movement of such investments. Please note the Fund's risk category may change in the future.

The indicator does not take into account the following risks of investing in this Fund:

Where the Fund makes investments in assets that are not denominated in GBP, changes in exchange rates will affect the value of your investment.

The Fund could lose money if an entity with which it interacts become unwilling or unable to meet its obligations to the Fund.

As an investor of another collective investment scheme, the Fund will bear, along with the other investors, its portion of the expenses of the other collective investment scheme, including management, performance and/or other fees. These fees will be in addition to the management fees and other expenses which a Fund bears directly with its own operations.

The Fund may invest in Exchange Traded Funds which represent a basket of securities that are traded on an exchange and may not necessarily trade at the net asset value of their underlying holdings. As a result, they may trade at a price that is above or below the value of the underlying portfolio.

Where the Fund invests in derivatives and forward transactions in the pursuit of the Fund's objective, the net asset value of the Fund may at times be volatile (in the absence of compensating investment techniques). However, it is the ACD's intention that the Fund will not have volatility over and above the general market volatility of the markets of the underlying investments and that the use of derivatives and forward transactions in the pursuit of the objective will not cause the risk profile to change.

The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.
