What is this product?

Type

Investment Company (SICAV), Luxembourg

Term

This sub-fund has no maturity date. However, the board of directors may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund investment objective is to provide long-term capital growth by investing principally in Nordic (Norwegian, Swedish, Finnish and Danish) Sustainable Companies. Sustainable Companies are those that the Investment Manager believes focus on climate and environment, healthy and prosperous societies, innovative and sustainable solutions, and sustainable cities and infrastructure. The sub-fund will invest a minimum of 90% of its total net assets in equities and equity related instruments (including but not limited to equity funds, equity options and futures, and contracts for difference). The sub-fund may invest up to 10% of its total net assets in Nordic fixed income securities, money market instruments, cash and cash equivalents. The sub-fund will hold long positions directly, or through the use of derivatives. The sub-fund may use exchange traded derivatives (including but not restricted to futures, options and forwards) on equities as well as on financial indices and exchange traded funds for investment purposes.

The sub-fund will also be able to write options on assets it holds. In addition, the sub-fund may use derivatives to hedge its cash exposure to Swedish Kronor. The sub-fund may hold long positions of up to 125% of its net assets. The sub-fund may not invest in aggregate more than 10% of its net assets in units of UCITS or UCIs (undertakings for collective investment). The sub-fund qualifies as an Article 9 product under SFDR (Sustainable Finance Disclosure Regulation) since its investment strategy contains ESG (Environmental, social and corporate governance) objectives. The sub-fund's four thematic sustainable investment objectives when selecting Sustainable Companies are linked to the United Nations 17 Sustainable Development Goals (UN SDGs), which contain a wide range of environmental, social and governance goals such as climate action, decent work and economic growth, responsible consumption and production, good health and well-being, peace and justice, sustainable cities and commodities etc. and the Ten Principles of the UN Global Compact in its investment process, which includes criteria on human and labour rights, environment and anti-corruption. The Investment Manager uses negative screening of assets for exclusion from the investment universe. More information about the Investment Manager's application of the exclusion criteria can be found on <https://www.norron.com/en/organisation/hallbarhet/norrns-exkluderingskriterier/>.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Intended retail investor

The sub-fund is offered to investors who may have basic or no knowledge and experience of investing in financial markets and also experienced investors and is intended for investors seeking exposure to the Nordic equity markets in general and appreciates the long term effects of the active approach that is synonymous with the investment style of the management team. Active management for us means large deviation from any benchmark when it comes to position size. The general portfolio turnover of the sub-fund could also be high, due to trading activities. The single purpose of the active management approach is to deliver a competitive alpha. This sub-fund may not be appropriate for investors who plan to withdraw their money within 7 years.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Derivatives Risk, Counterparty Risk, Concentration Risk, Operational Risk

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Recommended holding period: 7 years

Example investment: 100,000 SEK

		If you exit after 1 year	If you exit after 7 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	28,300 SEK	22,500 SEK
	Average return each year	-71.7 %	-19.2 %
Unfavourable	What you might get back after costs	78,300 SEK	80,400 SEK
	Average return each year	-21.7 %	-3.1 %
Moderate	What you might get back after costs	109,000 SEK	179,200 SEK
	Average return each year	9.0 %	8.7 %
Favourable	What you might get back after costs	173,200 SEK	253,400 SEK
	Average return each year	73.2 %	14.2 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 12 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment be-

tween December 2021 and December 2024.

Moderate scenario: This type of scenario occurred for an investment between June 2017 and June 2024, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between December 2014 and December 2021, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if FundRock Management Company S.A. is unable to pay out?

The Management Company is responsible for administration and management of the sub-fund, and does not typically hold assets of the sub-fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Management Company, as the PRIIPS manufacturer has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the sub-fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any, of this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 100,000 SEK is invested

	If you exit after 1 year	If you exit after 7 years
Total costs	850 SEK	10,048 SEK
Annual cost impact (*)	0.9 %	0.8 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.6% before costs and 8.7% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
