

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 Mar 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

What fees are investors charged?

Investors in the Stewart Investors Worldwide Leaders Sustainability Fund are charged fund charges. In the year to 31 March 2024 these were:

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of \$1,351 (that is 13.51% of his initial \$10,000). This gives Anthony a return after tax of \$1,217 for the year.

Notes

1. A combination of actual fund returns, and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until 30 September 2022 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.
