

Investment Objective

The objective of the fund is to create medium to long-term wealth for investors by taking advantage of valuation discrepancies that emerge in the credit market.

Fund Profile

The portfolio is a long/short focused fixed income portfolio. The portfolio will predominately invest in South African markets but is permitted to include investments in offshore jurisdictions subject to the investment conditions determined by regulations from time to time. The portfolios returns are accessed through fundamental knowledge of financial instruments vis-à-vis economic growth and broad economic themes as well as medium and long-term relative valuation opportunities.

Cumulative Performance Since Inception

The investment performance is for illustrative purposes only; the investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown; assuming income is reinvested on the reinvestment date.

The above benchmark(s) are for comparison purposes with the fund's performance. The fund does not follow the benchmark(s).

Return Analysis (Annualised)

	Fund	STeFi 3-Month Index
1 Year	28.48%	7.04%
3 Years	15.91%	7.74%
5 Years	14.12%	6.48%
10 Years	10.13%	6.44%
Since Inception	10.30%	6.17%

The portfolio converted its valuation frequency from monthly to daily valuation effective 10 May 2019. The performance shown above includes historical performance of the fund prior to its conversion to daily valuation

*The inception date for the portfolio is 1 January 2010. The historical performance figures until the end of 30 November 2016 reflect performance achieved prior to CISCA regulation. The portfolio has been transitioned under CISCA regulations on 1 December 2016 and has since been managed as a regulated product. The annualized total return is the average return earned by an investment each year over a given time period, since date of the launch of the fund. Actual annual figures are available from the manager on request. The highest and lowest 1 year returns represent the highest and lowest actual returns achieved during a 12 month rolling period year since the original launch date of the portfolio. The performance figures given show the yield on a Net Asset value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a Net Asset Value basis. The performance figures are reported net of fees with income reinvested

Risk Profile

Risk Level	Low	Low-Medium	Medium	Medium-High	High
------------	-----	------------	--------	-------------	------

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. FundRock Management Company (RF) (Pty) Ltd, ("the manager"), and the investment manager do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser

Market Commentary

March saw a sharp reversal in global risk sentiment as the escalation of the Middle East conflict triggered a significant energy shock and forced markets to reprice a more inflationary and less supportive policy backdrop. The effective closure of the Strait of Hormuz raised concerns around sustained supply energy disruption, driving a sharp increase in energy prices. This resulted in a broad "risk off" move, with equities and bonds declining in tandem, the US dollar strengthening, and volatility rising as investors reassessed the outlook for inflation, interest rates and growth.

In the United States, the S&P 500, Nasdaq and Dow Jones all closed lower (-5.0%, -4.8% and -5.2%), ending a prolonged period of strong performance. The Federal Reserve kept rates on hold, emphasising heightened uncertainty and the inflation risks stemming from higher energy prices. However, unlike prior oil shocks, the US has recently become a net oil exporter and is relatively more buffered against oil shocks than in the past. Treasury yields moved higher, with the 10-year yield rising to 4.3%, as markets scaled back expectations for near-term rate cuts. This occurred against a backdrop of a softening labour market, adding to concerns around the balance between slowing growth and rising inflation pressures. Europe was among the hardest hit regions, given its structural sensitivity to energy prices. Major equity indices, including the Euro Stoxx 50 (-9.1%) and DAX (-10.3%), declined sharply as the surge in energy costs compounded already weak growth dynamics. Inflation surprised modestly to the upside, further complicating the policy outlook for the European Central Bank. The region remains particularly vulnerable, with limited fiscal space, stiff competition from China, and still-recovering growth following the previous energy crisis, leaving policymakers constrained in their ability to cushion the shock.

China proved relatively more resilient in comparison. Lower inflation, a more coal-intensive energy mix and local natural gas supplies provided insulation from the immediate impact of the global energy shock. Economic data remained supportive, with PMI readings indicating some expansion, while prior strategic oil stockpiling helped mitigate near-term supply risks. The People's Bank of China maintained its policy stance, keeping policy rates unchanged, signalling a preference for stability rather than aggressive stimulus.

South African markets were not spared from the global sell-off, with local assets experiencing one of their weakest months in several years. The FTSE/JSE All Share Index declined sharply (-10.5%), driven primarily by a significant pullback in resource stocks as gold and PGMs came under pressure. Bonds outperformed equities but still delivered negative returns (ALBI: -6.8%), while the rand weakened materially (-7.6%) amid global risk aversion and a stronger US dollar. The South African Reserve Bank kept the repo rate unchanged at 6.75%, adopting a cautious stance while revising its inflation outlook higher due to the oil shock. Although the tone was less hawkish than expected, the SARB emphasised vigilance around second-round inflation effects, suggesting policy is likely to remain restrictive in the near term. Fiscal relief was provided through a temporary fuel levy reduction (R3/L), aimed at cushioning consumers from rising fuel costs.

Commodities were central to market dynamics during the month. Oil prices surged 63.3% on supply disruption fears, supporting energy-linked assets, while refined product prices increased even more sharply. In contrast, gold declined 11.6% despite heightened geopolitical risk, as higher real yields and a stronger US dollar (2.4%) reduced its appeal and investors scrambled to liquidate assets. The overall market environment was defined by the growing tension between inflation and growth, leaving both equities and bonds under pressure as investors navigated a more uncertain macroeconomic landscape.

Please Note: The above commentary is based on reasonable assumptions and is not guaranteed to occur.

Glossary

Net Asset Value (NAV):'	Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
Annualised Return':	Is the weighted average compound growth rate over the performance period measured.
Highest & Lowest Return':	The highest and lowest rolling twelve-month performance of the portfolio since inception.
Total Expense Ratio (TER):'	Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
Transaction Costs (TC):'	Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.
Total Investment Charges (TIC):'	Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
Total Investment Charges (TICR9):'	= TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
Standard Deviation':	The deviation of the return of the portfolio relative to its average.
Drawdown':	The greatest peak to trough loss until a new peak is reached.
Sharpe Ratio':	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
Sortino Ratio':	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
Correlation':	A number between -1 and 1 indicating the similarity of the dispersion of returns between the portfolio and another asset or index with 1 being highly correlated, -1 highly negatively correlated and 0 uncorrelated.
Value at Risk (VaR):'	Value at risk is the minimum loss percentage that can be expected over a specified time period at a predetermined confidence level
Leverage/Gearing':	The use of securities, including derivative instruments, short positions or borrowed capital to increase the exposure beyond the capital employed to an investment.

Fund Risk

Leverage Risk':	The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.
Derivative Risk':	Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
Counterparty Credit Risk':	Counterparty risk is a type of credit risk and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.
Volatility Risk':	Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.
Concentration and Sector Risk':	A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
Correlation Risk':	A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.
Equity Risk':	Applies to investment in shares or derivatives based on shares. The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares. Equity risk can either be systematic risk which is risk to the entire market based on political and economic indicators or unsystematic risk which is company specific and includes risk relating to company profits, future prospects and general consensus on the company or sector.

Portfolio Valuation & Transaction Cut - Off

Portfolios are valued daily. The cut off time for processing investment subscriptions is 14:00pm on a business day.

Total Expense Ratio

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

Mandatory Disclosures

Investment Manager: Fairtree Asset Management (Pty) Ltd, Registration Number: 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. This information is not advice, as defined in the Financial Advisory and Intermediary Services Act (No.37 of 2002). Please be advised that there may be representatives acting under supervision. Physical Address: Willowbridge Place, Cnr. Carl Cronje and Old Oak Road, Bellville, 7530. Postal Address: PO Box 4124, Tygervalley, 7536. Telephone Number: +27 86 176 0760. Website: www.fairtree.com. Management Company: FundRock Management Company (RF) (Pty) Ltd (the "Manager"), Registration Number: 2013/096377/07, is authorised in terms of the Collective Investment Schemes Control Act (CISCA) to administer Collective Investment Schemes (CIS). Physical Address: Catnia Building, Bella Rosa Office Park, Bella Rosa Street, Bellville, 7530, South Africa. Telephone Number: +27 (0)21 879 9937/(0)21 879 9939. Website: www.fundrock.com. Trustee: FirstRand Bank Limited (acting through its RMB Custody and Trustee Services Division). Physical Address: 3 Merchant Place, Ground Floor, Corner Fredman and Gwen Streets, Sandton, 2146 Telephone: +27 87 736 1732. Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance fees will be calculated and accrued on a daily basis based upon the daily outperformance, in excess of the benchmark, multiplied by the share rate and paid over to the manager monthly. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. A schedule of fees, charges, minimum fees and maximum commissions, as well as a detailed description of how performance fees are calculated and applied, is available on request from Fundrock Management Company (RF)(Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commission and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published daily on our website. Additional information, including key investor information documents, minimum disclosure documents, as well as other information relating to the basis on which the manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. Where foreign investments are included in the portfolio, performance is further affected by uncertainties such as changes in government policy, political risks, tax risks, settlement risks, foreign exchange risks, and other legal or regulatory developments. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority under CISCA. The Manager retains full legal responsibility for the portfolio. FirstRand Bank Limited, is the appointed trustee. Fairtree Asset Management (Pty) Ltd, FSP No. 25917, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services.
