

Fund Update

For the quarter ended 31 March 2025

- JPMorgan Funds
- JPMorgan Global Bond Fund

This fund update was first made publicly available on: 01 May 2025

What is the purpose of this update?

This document tells you how the JPMorgan Global Bond Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. FundRock NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: The Fund aims to achieve a gross return in excess of its benchmark by gaining exposure primarily to global investment grade debt securities, using derivatives where appropriate.

Strategy: The Fund invests substantially all its assets in an underlying fund, which focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers. This combines top down asset allocation and bottom-up security selection targeting diversified sources of portfolio return – including sector rotation, security selection, currencies and yield curve positioning. See the SIPO for more details.

Total value of the fund	\$73,907,463
The date the fund started	7 March 2025

What are the risks of investing? See note 1

Risk indicator for the JPMorgan Global Bond Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 Mar 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	N/A
Annual return (after deductions for charges but before tax)	N/A
Market index annual return (reflects no deduction for charges and tax)	4.17%

The market index return is Bloomberg Global Aggregate Index (Total Return Gross) hedged to NZD. This has been the market index since the inception of the fund.

Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

What fees are investors charged?^{See note 2}

Investors in the JPMorgan Global Bond Fund are charged fund charges which are:

	% of net asset value (inc. GST)
Total fund charges	0.47%
Which are made up of:	
Total manager and admin charges (inc. GST)	0.47%
Including:	
Manager's basic fee (inc. GST)	0.47%
Other management and administration charges	0.00%
Total performance-based fees	0.00%

Manager's basic fee includes an estimate of the charges incurred in the Underlying Fund in which the fund invests. The estimate incorporates information provided by the underlying fund manager as well as information sourced from the Underlying Fund's disclosure documents.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the JPMorgan Global Bond Fund on the offer register at <https://disclose-register.companiesoffice.govt.nz> for more information about those fees.

Example of how this applies to an investor See note 3

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund when the fund received its first contribution, 07 March 2025 and did not make any further contributions. At the end of the period to 31 March 2025, Anthony received a return after fund charges were deducted of \$13 (that is 0.13% of his initial \$10,000). This gives Anthony a return after tax of \$9 for the period.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual Investment Mix

Foreign currency exposure was 99.92% hedged to New Zealand dollars as at 31 March 2025

Notes

1. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. As the fund has not completed a full scheme year as at 31 March 2025, historical fee information is not available.
3. As the fund has not existed for a full year, figures in this example are based on returns from the date of the inception date.
