

#### Investment Objective

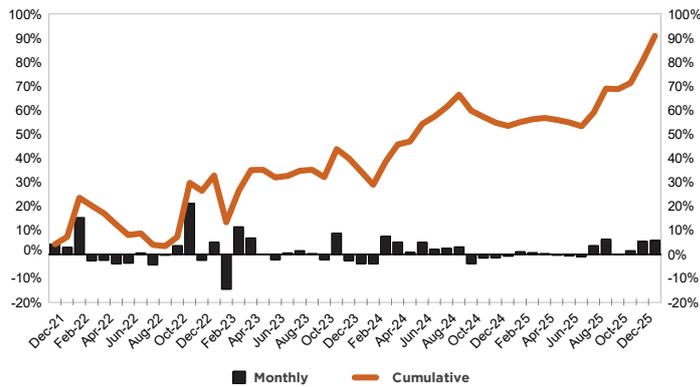

The Portfolio is a directionally biased long short equity portfolio which aims to capture equity market beta when conditions allow for it. The Portfolio's long term investment objective is to achieve consistent absolute returns through investment in long short equities based strategies.

#### Fund Profile

The Portfolio will be managed as a long short hedge fund. The focus is on extracting alpha returns from equities markets. These returns are accessed through fundamental knowledge of stocks vis-à-vis economic growth and broad economic themes as well as medium and long term relative valuation opportunities, generating the largest portion of its returns through its directional bias. Relative value pairs, together with absolute longs and shorts seek to stabilize returns in turbulent market conditions, supported by the adjustment to the net exposure

#### Cumulative Performance Since Inception

Risk Profile

Risk Level

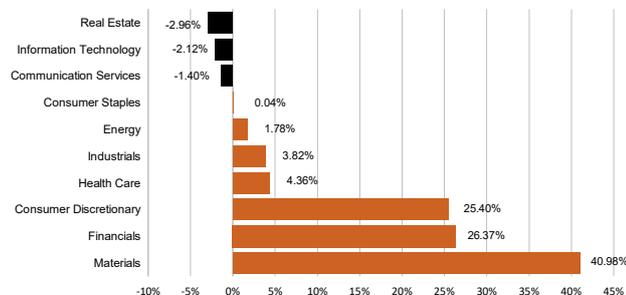

The risk category shown is not guaranteed and may change over time. The lowest category does not mean the investment is risk free. There may be other special areas of risk relating to the investment including liquidity risk, credit risk, market risk, and settlement risk. Fairtree Capital International IC Limited, ("the investment manager"), and the representative office do not render financial advice. Our risk indicator does not imply that the portfolio is suitable for all types of investors. You are advised to consult your financial adviser.

Number of Short Positions	Month-End	30	Monthly Average	32

Fund Risk

- Leverage Risk:** The Fund borrows additional funds, trades on margin or performs short sale trades to amplify investment decisions. This means that the volatility of a hedge fund portfolio can be many times that of the underlying investments due to leverage on a fund.
- Derivative Risk:** Derivative positions are financial instruments that derive their value from an underlying asset. Derivatives are exposed to implicit leverage which could result in magnified gains and/or losses on the portfolio.
- Counterparty Credit Risk** Counterparty risk is a type of credit risk and is the risk of default by the counterparty associated with trading derivative contracts. An example of counterparty credit risk is margin or collateral held with a prime broker.
- Volatility Risk:** Volatility refers to uncertainty and risk related to size of change of an instrument or portfolio. It is a statistical measure of the dispersion of returns for a given security or market index. Volatility is proportional to the directional exposure of a portfolio and is measured by Value at risk (VaR) which is a statistical technique used to measure and quantify the level of volatility.
- Concentration and Sector Risk:** A large proportion of total assets invested in specific assets, sectors or regions. Concentrated positions or concentrated sectors in a portfolio will material impact the returns of the portfolio more so than diversified portfolios.
- Correlation Risk:** A measure that determines how assets move in relation to each other. Correlation risk arises when the correlation between asset-classes change. Correlation risk also arises when the correlation within an asset-class changes. Examples of correlation within asset classes include equity pairs trading, fixed income curve trading and commodities pairs trading.
- Equity Risk:** The market price of shares varies depending on supply and demand of the shares. Equity risk is the risk of loss due to the drop in the market price of shares.
- Currency/Exchange Rate Risk:** Assets of a fund may be denominated in a currency other than the Base Currency of the fund and changes in the exchange rate between the Base Currency and the currency of the asset may lead to a depreciation of the value of the fund's assets as expressed in the Base Currency.

## Glossary

<b>Net Asset Value (NAV):</b>	Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.
<b>Annualised Return:</b>	Is the weighted average compound growth rate over the performance period measured. The highest and lowest rolling twelve-month performance of the portfolio since inception.
<b>Highest &amp; Lowest Return:</b>	Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.
<b>Total Expense Ratio (TER):</b>	
<b>Transaction Costs (TC):</b>	Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.
<b>Total Investment Charge (TIC):</b>	Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.
<b>Total Investment Charges (TIC%):</b>	= TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).
<b>Leverage/Gearing:</b>	The use of securities, including derivative instruments, short positions or borrowed capital to increase the exposure beyond the capital employed to an investment.
<b>Alpha:</b>	Denoted the outperformance of the fund over the benchmark.
<b>Sharpe Ratio:</b>	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
<b>Sortino Ratio:</b>	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
<b>Standard Deviation:</b>	The deviation of the return of the portfolio relative to its average.
<b>Drawdown:</b>	The greatest peak to trough loss until a new peak is reached.
<b>Correlation:</b>	A number between -1 and 1 indicating the similarity of the dispersion of returns between the portfolio and another asset or index with 1 being highly correlated, -1 highly negatively correlated and 0 uncorrelated.
<b>Value at Risk (VaR):</b>	Value at risk is the minimum loss percentage that can be expected over a specified time period at a predetermined confidence level
<b>Performance Fees:</b>	Performance fees will be calculated and accrued on a daily basis based upon the daily outperformance, in excess of the benchmark, multiplied by the share rate and paid over to the manager monthly.

## Portfolio Valuation & Transaction Cut - Off

Portfolios are valued monthly. The cut off time for processing investment subscriptions is 5:00pm (South African time) on the last business day of the prior month. Redemptions are subject to one calendar months notice.

## Total Expense Ratio:

A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.

## Mandatory Disclosures

Investment Manager: Fairtree Asset Management (Pty) Ltd, Registration Number: 2004/033269/07 is an authorised Financial Services Provider (FSP25917) under the Financial Advisory and Intermediary Services Act (No.37 of 2002), to act in the capacity as investment manager. Fairtree Assegai Segregated Portfolio is approved by the FSCA under Section 65 of the Collective Investment Scheme Control Act 2002 and has been categorised as a Collective Investment Scheme in Qualified Investor Hedge Fund for public sale in South Africa. Collective Investment Schemes (CIS) should be considered as medium to long-term investments. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Actual annual figures are available to the investor on request. Forward pricing is used. The Manager retains responsibility for any portfolio marketed on its platform. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Prices are published monthly on our website. An investor in the fund may experience a loss. No investor or prospective investor should assume that any information presented in this fact sheet serves as the receipt of, or a substitute for, personalized individual advice from Fairtree Assegai Segregated Portfolio or any other investment professional. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. This is a marketing communication. Further fund details, including risks, fees and expenses, and other information, such as the Offering Memorandum, Key Investor Information Documents (KIIDs) and other documentation (collectively, the Fund Documents), which can be obtained by emailing ops@fairtreeinternational.com. Please refer to the Fund Documents and consider all of a fund's characteristics before making any final investment decisions. This document is for information purposes only and does not constitute or form part of any offer to issue or sell or any solicitation of any offer to subscribe for or purchase any particular investments. Opinions expressed in this document may be changed without notice at any time after publication. We therefore disclaim any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever which may be suffered as a result of or which may be attributable directly or indirectly to the use of or reliance upon the information. The reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date
