

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 Mar 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	N/A
Annual return (after deductions for charges but before tax)	N/A
Market index annual return (reflects no deduction for charges and tax)	19.12%

The market index return is MSCI All Country World ex- Australia Net Total Return Index in New Zealand dollars. This has been the market index since the inception of the fund.

Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

What fees are investors charged?^{See note 2}

Investors in the Insync Global Quality Equity PIE Fund are charged fund charges which are:

	% of net asset value (inc. GST)
Total fund charges	0.98%
Which are made up of:	
Total manager and admin charges (inc. GST)	0.98%
Including:	
Manager's basic fee (inc. GST)	0.98%
Other management and administration charges	0.00%
Total performance-based fees	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Insync Global Quality Equity PIE Fund on the offer register at <https://disclose-register.companiesoffice.govt.nz> for more information about those fees.

Example of how this applies to an investor See note 3

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund when the fund received its first contribution, 12 August 2025 and did not make any further contributions. At the end of the period to 31 March 2026, Anthony incurred a loss after fund charges were deducted of \$584 (that is -5.84% of his initial \$10,000). This gives Anthony a loss after tax of \$648 for the period.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Actual Investment Mix

Foreign currency was not hedged to New Zealand dollars as at 31 March 2026

Further information

You can also obtain this information, the PDS for the Insync Investment Funds, and some additional information from the offer register at <https://disclose-register.companiesoffice.govt.nz>.

Notes

1. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until the inception date and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. As the fund has not completed a full scheme year as at 31 March 2025, historical fee information is not available.
3. As the fund has not existed for a full year, figures in this example are based on returns from the date of the inception date.
