Antipodes Emerging Markets Fund (PIE)

Monthly Report | 31October 2026

About Antipodes

- A global investment manager with a pragmatic value approach, offering long only and long short equity strategies alongside global credit.
- We seek mispriced investments relative to the resilience and growth of the underlying business, offering a high margin of safety between the price we pay and our assessment of what that business is worth.
- We build portfolios with capital preservation in mind, taking risk only where we believe the opportunity warrants it.
- Majority owned by our investment team, aligning their interests with those of our investors. Head office based in Sydney, Australia with offices in Melbourne and London.

Fund features

- Objective to achieve absolute returns in excess of the benchmark over the investment cycle (typically 3-5 years).
- The Fund invests in companies that are exposed to emerging markets or listed on emerging market stock exchanges.
- In the absence of finding individual securities that meet minimum risk-return criteria, cash may be held to a maximum 25%.
- Flexibility to hedge for risk management purposes:
  - Currency exposure of the underlying stock position (net short currency position not permitted).
  - Equity market exposure via exchange traded derivatives (limited to 10% of NAV).
  - Leverage not permitted.

[1] Based on gross returns in NZD

[2] GICS classification

[3] Call (put) options represented as the current option value (delta adjusted exposure)

[4] All metrics are based on gross of fee returns in AUD terms since inception. The upside/downside capture ratio is the percentage of benchmark performance captured by the fund during months that the benchmark is up/down. Standard deviation is a measure of risk with a smaller figure indicating lower return volatility. The Sharpe ratio measures returns on a risk adjusted basis with a figure > 1 indicating a higher return than the benchmark for the respective levels of return volatility.
