

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FP WHEB Sustainability Fund, a sub-fund of FP WHEB Asset Management Funds

Class A Accumulation Shares (USD) (ISIN GB00BFXBL341)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

Medium to long term capital growth.

Policy:

- At least 80% of the Fund will be invested in shares and in companies anywhere in the world in sectors which have been identified as providing solutions to the challenges of sustainability.
- We may invest up to 10% of the Fund in cash deposits if we think this is appropriate at the time.
- The Fund may also invest in:
 - other types of shares, bonds (contracts to repay borrowed money with interest at fixed intervals) and other types of investments which are mainly bought or sold on the stock markets,
 - regulated funds (which are schemes where retail investors' money is pooled to buy investments),
 - money market instruments (which are a type of security where cash can be deposited for short periods) and other similar cashlike investments.
- we can use derivatives (contracts to where the value is linked to the expected future price movements of an underlying asset) for efficient portfolio management which should not lead to an increase in risks to the Fund.

Benchmark:

MSCI World Index

- For the purpose of providing comparable indicative returns only, investors should refer to the MSCI World Index (the "Index"), which is used as a comparator benchmark.
- The Index is used a comparator benchmark, because it is the most recognised measure of global equity returns.

Investment Association's (IA) IA Global sector peer group ("Peer Group")

- Reference to the performance of the global equity funds peer group, is also a relevant comparator benchmark included in the Fund's reporting to compare the Fund's performance against the performance of other funds pursuing a similar objective.
- However, neither the Index nor the Peer Group is used to constrain the construction of the portfolio or investment management decisions. Given the Fund's particular objective, the Fund's holdings typically have a very low level of overlap with either the MSCI World Index or the Peer Group. It is therefore not appropriate to categorise the Index as a target benchmark against which performance of the Fund is set or constraining benchmark which constrains the portfolio composition of the Fund. Instead the Index is used as a comparison tool to give context for the performance of the Fund. The ACD retains the option of adding additional comparator benchmarks in the future, where it is felt that it would be valuable for investors to have additional measures against which to compare the Fund.

Other information:

- We carry out investors' requests to buy, sell or switch at midday on each working day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next working day.
- As you hold accumulation shares, income from investments in the Fund will be rolled up into the capital assets of the Fund.
- Class A Accumulation Shares are denominated in US Dollars.
- Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

◀ Lower Risk

Typically lower rewards

1 2 3 4 5 6 7

• This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The Fund appears as a "5" on the scale. This is because it invests in the shares of companies, whose values tend to vary more widely. The indicator does not take account of the following risks of investing in the Fund:

• The Fund invests in shares and the value of these investments may go up and down. Investors may not get back the original amount invested.

• The Fund will only invest in companies which fit the themes of clean energy,

water, pollution abatement and healthcare which means there will be a limited number of companies worldwide which fit these themes. This limitation may constrain growth in the Fund and the Fund may experience a higher level of volatility than funds which invest in the broader market universe.

• A portion of the Fund's assets may be invested in smaller companies. This investment can involve more risk than investing in larger, more established companies. Shares in smaller companies are often not as easy to sell as shares in larger companies are. This can cause difficulty in buying, valuing and selling those shares. Also, reliable information for deciding their value or the risks may not be available.

• Stock market prices, currencies and interest rates can move irrationally and can be affected unpredictably by diverse factors, including political and economic events.

• There is a risk that third parties that the Fund enters into investment contracts with fail to meet their obligations and the Fund may suffer a loss.

For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available from the ACD at FundRock Partners Limited – WHEB Asset Management, PO Box 10449, Chelmsford, CM99 2UU or, during normal business hours on 01268 44 8234.
