Henderson Rowe, a sub-fund of FP Henderson Rowe Index Funds

Class B Accumulation Shares (GBP) (ISIN GB00B4X90018)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The objective of the Fund is to track the returns of FTSE RAFI® Emerging Markets Index (the "Index") in GBP (Sterling) terms.

Policy:

- The Fund will invest at least 70% of its assets directly in the same investments which make up the FTSE RAFI® Emerging Markets Index (the "Index"). The Fund's assets will generally be invested in the same proportions as the amount of each investment in the Index.
- The Fund can also attempt to meet its investment objectives by investing in:
 - other types of shares, bonds (contracts to repay borrowed money with interest at fixed intervals);
 - regulated funds (which are schemes where investors' money is pooled to buy investments);
 - investments such as cash and similar cash-like investments, as well as money market instruments (which are a type of security where cash can be deposited for short periods).
- We may also lend the Fund's assets to others for a fee, borrow money and use derivatives (contracts whose value is linked to the expected future price movements of an underlying asset) for efficient portfolio management which should not lead to an increase in risk to the Fund. On giving 60 days' notice to shareholders, derivatives may be used for the purposes of investment.

Benchmark:

The Index is a constraining benchmark that determines the make-up of the portfolio of the Fund and is designed to track the performance of the largest Emerging Markets Equities, selected based on four fundamental measures of: firm size; book value, cash flow, sales and dividends. See: http://www.ftse.co.uk/Indices/FTSE_RAFI_Index_Series/index.jsp. The Fund will physically replicate the Index by investing in all or substantially all, of the stocks that make up the Index. Anticipated gross performance of the Fund is: within 0.75% of that of the index on an annual basis in normal market conditions. Factors likely to affect Fund's ability to track performance of Index include, but are not limited to, transaction costs (from Index turnover and dividend re-investment), portfolio weightings not being exactly the same as the Index, small amounts of cash not being invested in stock, Efficient Portfolio Management, illiquid components and trading restrictions in some currencies

Other information:

- We carry out investors' requests to buy, sell and switch at midday on each working day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next working day.
- Income from investments in the Fund will be rolled up into the value of your shares.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.

• The Fund is in risk category "6" as its price may rise and fall significantly because investments of this type tend to be more volatile than those in developed markets. The indicator does not take account of the following risk of investing in the Fund:

- Changes to regulations and regimes may occur in some emerging markets more rapidly than in developed markets. This could lead to restrictions being placed on some of the Funds underlying assets from time to time.
