This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FP CAF Fixed Interest, a sub-fund of FP CAF Investment Fund

Class A Accumulation Shares (GBP) (ISIN GB00B5LSVX77)

Class A Income Shares (GBP) (ISIN GB00B67GDR02)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The Fund aims to achieve a balance of income and capital growth over the medium to longer term, the total of which is in excess of that of the Global Fixed Interest market, hedged into £-Sterling.

Policy:

The Fund aims to generate a return, which is in excess of that of the Global Fixed Interest market average as measured by generally accepted broad market indices, like the Merrill Lynch Sterling Broad Market or Citigroup World Broad Investment Grade Bond.

The Fund will seek to achieve its objective through investments primarily in global fixed interest securities. This will be achieved either through direct investments (such as gilts and bonds) or through shares and units of collective investment schemes such as unit trusts, and open-ended investment companies (OEICs), as well as closed-ended schemes. Foreign currency exposure may be hedged back into £-Sterling.

The Fund may also invest, at the ACD's discretion, in other transferable securities and collective investment schemes, money market instruments, cash and near cash and deposits to meet the investment objective. Use may also be made of stocklending, borrowing, cash holdings, derivatives for hedging and other investment techniques for efficient portfolio management permitted in COLL.

Benchmark:

For the purpose of providing comparable indicative returns only, investors should refer to a blended benchmark of 50% Merrill Lynch Sterling Broad

Market and 50% Citigroup World Broad Investment Grade Bond and to the Investment Association (IA) Sterling Strategic Bond sector ('Comparator Benchmarks').

The Comparator Benchmarks have been chosen as they reflect the composition of the Fund and its bias towards investments in Sterling (or Sterling hedged) fixed interest securities.

The Comparator Benchmarks do not represent, or act as, a constraint in the selection of individual investments in the Fund or the management of the Fund's portfolio.

The performance of the Fund may deviate materially from the performance of the Comparator Benchmarks.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean 'risk free'.

The Class A Shares above appear as a '3' on the scale. The Fund invests in fixed income investments whose values do not fluctuate widely.

The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

Counterparty Risk—The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.

Portfolio Concentration Risk—The Fund will hold a more concentrated portfolio of underlying assets than an average fund. Whilst increasing the

potential reward, there may also be an increased risk. As such, the returns may be more volatile and will be impacted more by fluctuations in the value of the Fund's underlying assets.

Liquidity Risk—Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

Management Risk—Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.

Exchange Rate Risk—Fluctuations in exchange rates may cause the value of your investment to rise or fall.

Non-UCITS Retail Schemes (NURS) - The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.

Overseas bonds and currencies - From time to time, the Fund may invest in overseas bonds and currencies. These markets may respond to different influences to those that affect the underlying funds and accordingly carry a higher degree of risk.
