

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FP Mattioli Woods Cautious Fund, a sub-fund of FP Mattioli Woods Funds ICVC

Class C Income Shares (GBP) (ISIN GB00BZCN8D00)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The investment objective of the Fund is to preserve capital and generate capital growth (the increase in value of investments) over an investment term in excess of five years and to generate income (money paid out by an investment, such as interest from a bond or a dividend from a share). It is not guaranteed that the Fund will achieve its objective of capital preservation.

Policy:

- The Fund aims to achieve its objective by investing a minimum of 70% in collective investment schemes (including open ended investment companies, unit trusts, exchange-traded funds and closed ended investment companies) gaining exposure to global fixed income securities (such as bonds), global equity securities (such as shares), property securities, infrastructure securities and alternative asset classes.
- The Fund will also have the ability to invest in shares, bonds (a loan, usually to a company or government, that pays interest), money market instruments (investments usually issued by banks or governments that are a short term loan to the issuer by the buyer), cash and near cash deposits at any time.
- The Fund will not invest more than 25% in any single collective investment scheme.
- The Investment Manager expects that the Fund will typically invest in the region of 45% in equities. This does not, however, operate to restrict the Fund's investment in equities and the Fund may at any time invest anywhere between 0-60% in equities.
- The Fund can invest in other funds managed by the ACD or its associates.
- The Fund may hold both investment grade and sub-investment grade bonds. Sub-investment grade bonds have a lower credit rating than investment grade bonds and carry a higher degree of risk.
- Use may also be made of derivatives (investments whose value is linked to another investment, or the performance of a stock exchange or to some other variable factor, such as interest rates) for efficient portfolio management purposes. Efficient portfolio management is where the Fund is managed in a way that is designed to reduce risk or cost and/or generate extra income or growth. The use of derivatives is not intended to alter the risk profile of the Fund.
- The asset allocation of the Fund will be constructed and managed in such a way as to ensure there is diversity (the holding of a variety of investments that typically perform differently from one another) within the Fund both by geography and investment sector, but with a bias to sterling assets that reflects the likely residency of most of the Fund's investors.

- The Fund will have exposure to alternative asset classes (such as commodities, hedge funds, property and infrastructure).
- The Fund is suitable for investors seeking a cautious risk profile.
- A cautious risk profile is intended for investors with a greater focus on growth than a conservative investor, but still holds a significant focus on minimising the potential for capital loss.

Benchmark:

Investment Association's (IA) Mixed Investment Shares 20-60% sector peer group ("Peer Group")

- The Mixed Investment 20-60% Shares sector peer group comprises other funds which pursue a similar objective to the Fund. As such, the ACD considers the performance of this sector group to be a suitable comparator for Investors to use when assessing the performance of the Fund.
- However, the Peer Group is not used to constrain the construction of the portfolio or investment management decisions. Given the Fund's particular objective, the Fund's holdings typically have a very low level of overlap with the Peer Group. It is therefore not appropriate to categorise the Peer Group as a target benchmark against which performance of the Fund is set or constraining benchmark which constrains the portfolio composition of the Fund. Instead the Peer Group is used as a comparison tool to give context for the performance of the Fund. The ACD retains the option of adding additional comparator benchmarks in the future, where it is felt that it would be valuable for investors to have additional measures against which to compare the Fund.

Other information:

- You can buy and sell shares on most business days where the London Stock Exchange is open for a full range of services.
- The Fund's base currency is Pounds Sterling. We carry out investors' requests, to buy, sell or switch, at midday on each business day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next business day.
- The portfolio is suitable for investors that are willing to invest for the medium-term and accept some short-term price volatility in order to generate sustained longer-term capital growth and income.
- There can be no guarantee that the objective of the Fund will be achieved.
- On encashment, particularly in the short-term, you may receive less than the original amount invested.
- As you hold income shares, income from investments in the Fund will be paid out to you twice a year.

Risk and reward profile

◀ Lower Risk

Typically lower rewards

Higher Risk ▶

Typically higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean 'risk free'.

The Class C Shares above appear as a '4' on the scale. This is partly because the Fund invests in the shares of companies, whose values tend to vary more widely.

The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

Counterparty Risk—The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.

Liquidity Risk—Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

Management Risk—Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.

Exchange Rate Risk—Fluctuations in exchange rates may cause the value of your investment to rise or fall.

Investing in other collective investment schemes - As an investor of another collective investment scheme, the Fund will bear, along with the other investors, its portion of the expenses of the other collective investment scheme, including management, performance and/or other fees. These fees will be in addition to the management fees and other expenses which a Fund bears directly with its own operations.

Non-UCITS Retail Schemes (NURS) - The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.

Exchange Traded Funds - The Fund may invest in Exchange Traded Funds which represent a basket of securities that are traded on an exchange and may not necessarily trade at the net asset value of their underlying holdings. As a result, they may trade at a price that is above or below the value of the underlying portfolio.

Overseas bonds and currencies - From time to time, a Fund may invest in overseas bonds and currencies. These markets may respond to different influences to those that affect the underlying funds and accordingly carry a higher degree of risk.

FUNDROCK
management company

Charges for this fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

	Class C Inc (GBP)
Entry Charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested (Entry charge) or before the proceeds of your investment are paid out (Exit charge).

Charges taken from the fund over a year

Ongoing charge	0.61
----------------	------

Charges taken from the fund Under a certain specific conditions

Performance fee	-
-----------------	---

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds) you might pay less -you can find out actual entry and exit charges from your financial adviser.

The ongoing charges figure is based on published expenses for the period ending 31 January 2020. Ongoing charges may vary from year to year. The ongoing charges figure includes any portfolio transaction costs which the Fund pays to its service providers (e.g. to the Fund's custodian) and any entry/exit charges the Fund pays when buying/selling units in another fund. In general, however, the figure excludes other portfolio transaction costs.

For more information about charges please see Section 7 of the Fund's Prospectus, which is available at www.FundRock.com. You may also request the Prospectus from the Fund's Administrator at FundRock Partners Limited - Mattioli Woods, PO Box 12764, Chelmsford, CM99 2FJ, or, during normal business hours on 0330 123 3720. A Supplementary Information Document (SID) giving general details about the Fund is also available at www.FundRock.com or on the above number.

Past performance
