FP Octopus UK Multi Cap Income Fund, a sub-fund of FP Octopus Investments UCITS Funds

Class R Accumulation (ISIN GB00BG47Q770)

Class R Income (ISIN GB00BG47Q887)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The investment objective is to achieve (on a net of fees basis), over a 5 year rolling period, income generation (money paid out by an investment, such as interest from a bond or dividend from a share) which is on average in line with the FTSE All Share Index (the "Target") and capital growth (the increase in the value of investments) above the Target.

Policy:

The Fund will invest at least 80% (including, to a limited extent, through real estate investment trusts (REITs) and investment companies) in companies that are listed and domiciled in the UK, or incorporated in the UK, or have a significant exposure to the UK.

The Fund may invest in companies of any size including constituents of the FTSE 100 index, but there will typically be a bias (when compared against the FTSE All Share Index) towards constituents of the FTSE 250 Index, FTSE Small Cap Index, and companies listed on the Alternative Investment Market ("AIM").

There is no particular emphasis on any industrial or economic sector.

The Fund may also invest in collective investment schemes, money market instruments and other transferable securities (such as shares, debentures, government and public securities). Money market instruments are investments that take the form of short term loans made by the Fund to banks or governments (the issuer).

Use may also be made of derivatives (investments whose value is linked to another investment, or the performance of a stock exchange or to some other variable factor, such as interest rates) and forward transactions for efficient portfolio management. Efficient portfolio management is where the Fund is managed in a way to reduce risk or cost and/or generate extra income or growth.

Under extraordinary market conditions or following significant inflows into the Fund, the Fund may hold less than 80% of its scheme property in companies that are listed and domiciled in the UK, or incorporated in the UK, or have a significant exposure to the UK. The Fund may hold a larger amount of cash where, in such circumstances, the investment manager considers this to be in the best interests of the Fund.

Extraordinary market conditions could be due to political, economic unrest or instability, world events leading to market instability, closure of any UK stock exchange, or any event which could cause the risk profile of the Fund to be increased.

The Fund will be managed in a manner that maintains eligibility for ISAs.

Benchmark:

The Fund is actively managed.

The performance of the Fund has been set against the FTSE All Share Index as a target benchmark (the "Target Benchmark") which means that the Fund seeks to provide income in line with and capital growth above an equivalent investment in the Target Benchmark (i.e. in the same companies and proportions as the Target Benchmark) on a net of fees basis.

Investors may compare the Fund's performance against the IA UK Equity Income Sector (the "Comparator Benchmark").

The Target Benchmark and the Comparator Benchmark have been chosen by the Investment Manager as they reflect the composition of the Fund and its bias towards investment in UK equities.

The Target Benchmark and the Comparator Benchmark do not represent, or act as, a constraint in the selection of individual investments in the Fund or the management of the Fund's portfolio.

The performance of the Fund may deviate materially from the performance of the Target Benchmark and the Comparator Benchmark

Other information:

You can buy and sell shares on most business days where the London Stock Exchange is open for a full range of services.

We carry out investors' requests, to buy, sell or switch, at midday on each business day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next business day.

If you hold accumulation shares, income from investments in the Fund will be rolled up into the value of your shares.

If you hold income shares, income from investments in the Fund will be paid out to you four times a year.

Investors should note that while the investment objective of the Fund is to achieve capital growth there may be situations in which an income return is also achieved.

The Fund will be managed in a manner that maintains eligibility for ISAs.

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years.

There can be no guarantee that the objective of the Fund will be achieved.

On encashment, particularly in the short-term, you may receive less than the original amount invested.

Charges applicable to the Fund accrue daily, therefore an equivalent rise in the value of shares is required before the original investment can be recovered.

Risk and reward profile

Lower Risk

Typically lower rewards

Higher Risk

Typically higher rewards

This indicator above is not a measure of the risk of capital loss, but an estimated measure of the Fund's price movement over time. It is based on historical data, and thus may not be a reliable indication for the future.

The risk category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean 'risk free'.

The Fund appears as a "5" on the scale. This is because the Fund by its nature invests in the shares of companies, whose values tend to vary more widely.

The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by the following risks:

The Fund invests in shares and the value of these investments may go up and down. Investors may not get back the original amount invested.

The Fund invests in small company securities which may be less liquid than the securities of larger companies. Securities in smaller companies may also involve risks, such as limited product lines, markets and financial or managerial resources and trading such securities may be subject to abrupt price movements than trading in the securities of larger companies.

Certain securities could become hard to value, sell at a desired time and place, or cease to trade altogether.

There is a risk that third parties that the Fund enters into investment contracts with will fail to meet their obligations and the Fund may suffer a loss.

Changes in exchange rates may mean the value of investment goes up and down.

The Fund may make use of efficient portfolio management techniques to reduce risk and/or costs in the Fund and to produce additional capital or income in the Fund. It is not intended that using derivatives for efficient portfolio management will increase the volatility of the Fund.
