### Objective and investment policy

#### Objective:

Long term capital growth.

#### Policy:

- at least 80% of investment is in:
  - non UK company shares;
  - regulated funds (which are schemes where investors' money is pooled to buy investments) which invest mostly in non UK company shares;
  - other investments which provide exposure to non UK company shares and UK fixed income investments (which are investments which could be issued by a company, a government or another entity that pay a fixed level of interest);
- we may invest up to 100% of the Fund in investments which generate growth;
- the Fund can also invest in other types of shares, bonds (contracts to repay borrowed money with interest at fixed intervals) and other types of investments which are mainly bought or sold on stock markets, investments such as cash and similar cash-like investments, as well as money market instruments (which are a type of security where cash can be deposited for short periods); we may use derivatives (contracts whose value is linked to the expected future price movements of an underlying asset) for efficient portfolio management which should not lead to an increase in risk to the Fund. On giving 60 days notice to shareholders, derivatives may also be used for the

purposes of investment.

#### Benchmark:

- against which Fund performance is compared: MSCI All Country World Index Net 50% Hedged to GBP (because it reflects the geographical diversification of the securities held by the Fund). The Fund is not obliged to hold all constituents of the Comparator Benchmark. Performance may deviate materially from the Comparator Benchmark.
- The investment manager has discretion over the portfolio composition.
- Portfolio composition is not constrained by a benchmark.

#### Other information:

- Buying/selling shares: on each working day at 07:00 if you tell us before 17:00 on the working day before, except on UK public holidays.
- For accumulation shares, income will be rolled up into the value of shares.
- For income shares, income from investments is paid out once a year.
- we use investment techniques to protect the value of the Fund, including using interest rate futures and forward contracts in order to reduce the risks otherwise associated with making investments in currencies other than the Fund's accounting currency (sterling).
- recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
