The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FP Russell Investments Defensive Assets Fund, a sub-fund of FP Russell Investments ICVC

Class B Accumulation Shares (GBP) (ISIN GB00B4L7GC13)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The Fund aims to achieve capital appreciation (profit on investments held) which exceeds the Bank of England Base rate over the long term (5 rolling year periods) (on a net of fees basis).

Capital is at risk as the value of investments can go down as well as up and there is no guarantee that the Fund will achieve its objective over rolling 5 year periods or any time period. Investors may get back less than the amount originally invested.

Policy:

The Fund will seek to achieve its objective by investing (directly and indirectly) in a range of fixed income and cash asset classes and will not invest in assets subject to equity market fluctuations. The Fund will invest at least 80% or more of its assets in:

- Global fixed income securities (which are investments that pay a fixed level of interest and that could be issued by a company, a government or other entity);
- Money market instruments (a type of security dealt with on the money market where cash can be deposited for short periods such as treasury bills, certificates of deposit and commercial papers and excluding instruments of payment) cash and near cash, deposits; and/or
- Collective investment schemes that invest at least 80% of their assets in global fixed income securities (government debt, investment grade debt, high yield credit and floating rate securities), money market instruments, cash and near cash, deposits or collective investment schemes whose objective is to exceed a cash benchmark.

This will be achieved by investing at least 70% in a combination of Russell Investments collective investment schemes as well as external collective investment schemes.

The Fund will not invest in equity or equity-related investments.

Use may also be made of derivatives (investments whose value is linked to another investment, or the performance of a stock exchange or to some other variable factor, such as interest rates) for efficient portfolio management and for investment purposes. Efficient portfolio management is where the fund is managed in a way to reduce risk or cost and/or generate extra income or growth.

The Fund is intended to form a component part of a diversified portfolio of holdings, rather than as a standalone investment.

Benchmark:

The Bank of England Base Rate is the target benchmark against which the performance of the Fund has been set ("Target Benchmark"). The Target Benchmark was chosen because the Fund aims to generate cash equivalent returns. The Investment Manager has discretion over portfolio composition (which is not constrained by a benchmark). The Fund is intended to form a component part of a diversified portfolio of holdings, rather than as a standalone investment.

Other information:

- You can buy and sell your shares in the Fund on each working day at 07:00 if you tell us before 17:00 on the working day before, except on UK public holidays.
- Holders of accumulation Shares are not entitled to be paid the income attributed to such Shares, but that income is automatically transferred to (and retained as part of) the capital assets of the relevant Fund on the relevant interim and/or annual accounting dates. This is reflected in the price of an accumulation Share.
- The Fund may use investment techniques to protect the value of the Fund, including using interest rate futures and forward contracts in order to reduce the risks otherwise associated with making investments in currencies other than the Fund's accounting currency (sterling).
- This Fund is aimed at investors with a more limited risk appetite and a shorter time horizon.

• This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

• The risk category shown is not guaranteed to remain unchanged and may shift over time.

• The lowest category does not mean 'risk free'.

• The Fund appears as a '3' on the scale. The Fund invests in fixed income investments whose values do not fluctuate widely.

• The Funds will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default.

• A Fund's investments may be acquired in a wide range of currencies and

changes in exchange rates between currencies may cause the value of an investment in a Fund to fluctuate.

• If interest rates go up, the value of the capital may fall, and vice versa.

• A third party which issues bonds may fail to meet its interest repayments, or repay its debt, leading to losses for the Fund. The risk is greater for investments that have a lower credit-rating.

• Derivatives can carry a high degree of risk - a relatively small movement in the price of the underlying security may result in a disproportionately large movement, unfavourable or favourable, in the price of the derivative. Please do not invest if you do not have the level of knowledge required in order to assess and evaluate the risks associated with the use of derivatives by the Fund or the impact of derivatives on your investment.

For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available from FundRock Partners Limited – Russell Investments, PO Box 10204, Chelmsford, CM99 2AQ or, during normal business hours on 01268 44 8211.
