The indicator does not take account of the following risks of investing in the Fund:

- Retail investors may choose to seek advice before investing.**

- Derivatives can carry a high degree of risk - a relatively small movement in the price of the underlying security may result in a disproportionately large movement, unfavourable or favourable, in the price of the derivative. **Please do not invest if you do not have the level of knowledge required in order to assess and evaluate the risks associated with the use of derivatives by the Fund or the impact of derivatives on your investment.**

- A counterparty to a derivative or other contract may fail to honour its commitments potentially creating a loss to the Fund.

- The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.

- Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates increase, capital values may fall and vice versa. Inflation will erode the real value of capital.

- Changes in exchange rates may mean the value of your investment goes up and down.

- The Fund may invest into Russian corporations and investors should note that Russia has weaker corporate governance, auditing and financial reporting standards than those in developed markets.
