- The Fund may invest up to 10% of its Net Asset Value in units of other collective investment schemes (including collective investment schemes managed by the ACD).
- The Fund may invest up to: 10% of its Net Asset Value in securitised instruments, which are instruments based on a pool of various types of underlying assets, such as loans; and, 5% of its Net Asset Value in distressed securities, which are financial instruments relating to a company that is in some sort of financial distress. The Fund may also use securities lending for the purposes of efficient portfolio management.

Benchmark:

For the purpose of providing comparable indicative returns only, investors should refer to the Comparator Benchmarks:

- MSCI AC WORLD NR (USD) (the MSCI global international equities index) (50%)
- ICE BofA Merrill Lynch Global Government Bond Index (50%)

The Comparator Benchmarks have been chosen by the ACD as they are a broad measure of equity- market performance throughout the world (MSCI AC World NR (USD), and sovereign debt, denominated in a variety of currencies (ICE BofA Merrill Lynch Global Government Bond Index (50%)).

The Comparator Benchmark is also used in calculations designed to measure and manage the level of risk that the Fund is exposed to.

- This indicator is based on historical data using a similar proxy fund and may not be a reliable indication of the future risk profile of the Fund.

- The risk category shown is not guaranteed to remain unchanged and may shift over time.

- The lowest category does not mean 'risk free'.

- The Class A Shares above appear as a '4' on the scale. This is because the Fund's simulated proxy invests in a mixture of investments. The value of some of these investments may vary more widely than others.

- The risk indicator figure is not related to the risk scale number of the Fund.

- The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.

The indicator does not take account of the following risks of investing in the Fund:

- Retail investors may choose to seek advice before investing.**
- Derivatives can carry a high degree of risk - a relatively small movement in the

price of the underlying security may result in a disproportionately large movement, unfavourable or favourable, in the price of the derivative. **Please do not invest if you do not have the level of knowledge required in order to assess and evaluate the risks associated with the use of derivatives by the Fund or the impact of derivatives on your investment.**

- A counterparty to a derivative or other contract may fail to honour its commitments potentially creating a loss to the Fund.

- The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.

- The ACD will undertake certain hedging transactions specifically to reduce the exposure of the hedged share classes to movements in the base currency of the Company, however these strategies will not completely eliminate the exposure of these share classes and no assurance can be given that the hedging objective will be achieved. Shareholders in hedged share classes may still be exposed to an element of currency exchange risk.

- Investments in emerging markets may be more volatile or risky than investments in more developed markets because of: relatively unstable governments; economies based on only a few industries; limited number of securities traded on securities markets; less developed regulatory systems; or less stringent disclosure standards.

- See the Fund's Prospectus (Section 18) for more risk information.
